شركة التكافل للتأمين
TAKAFUL INSURANCE Co.

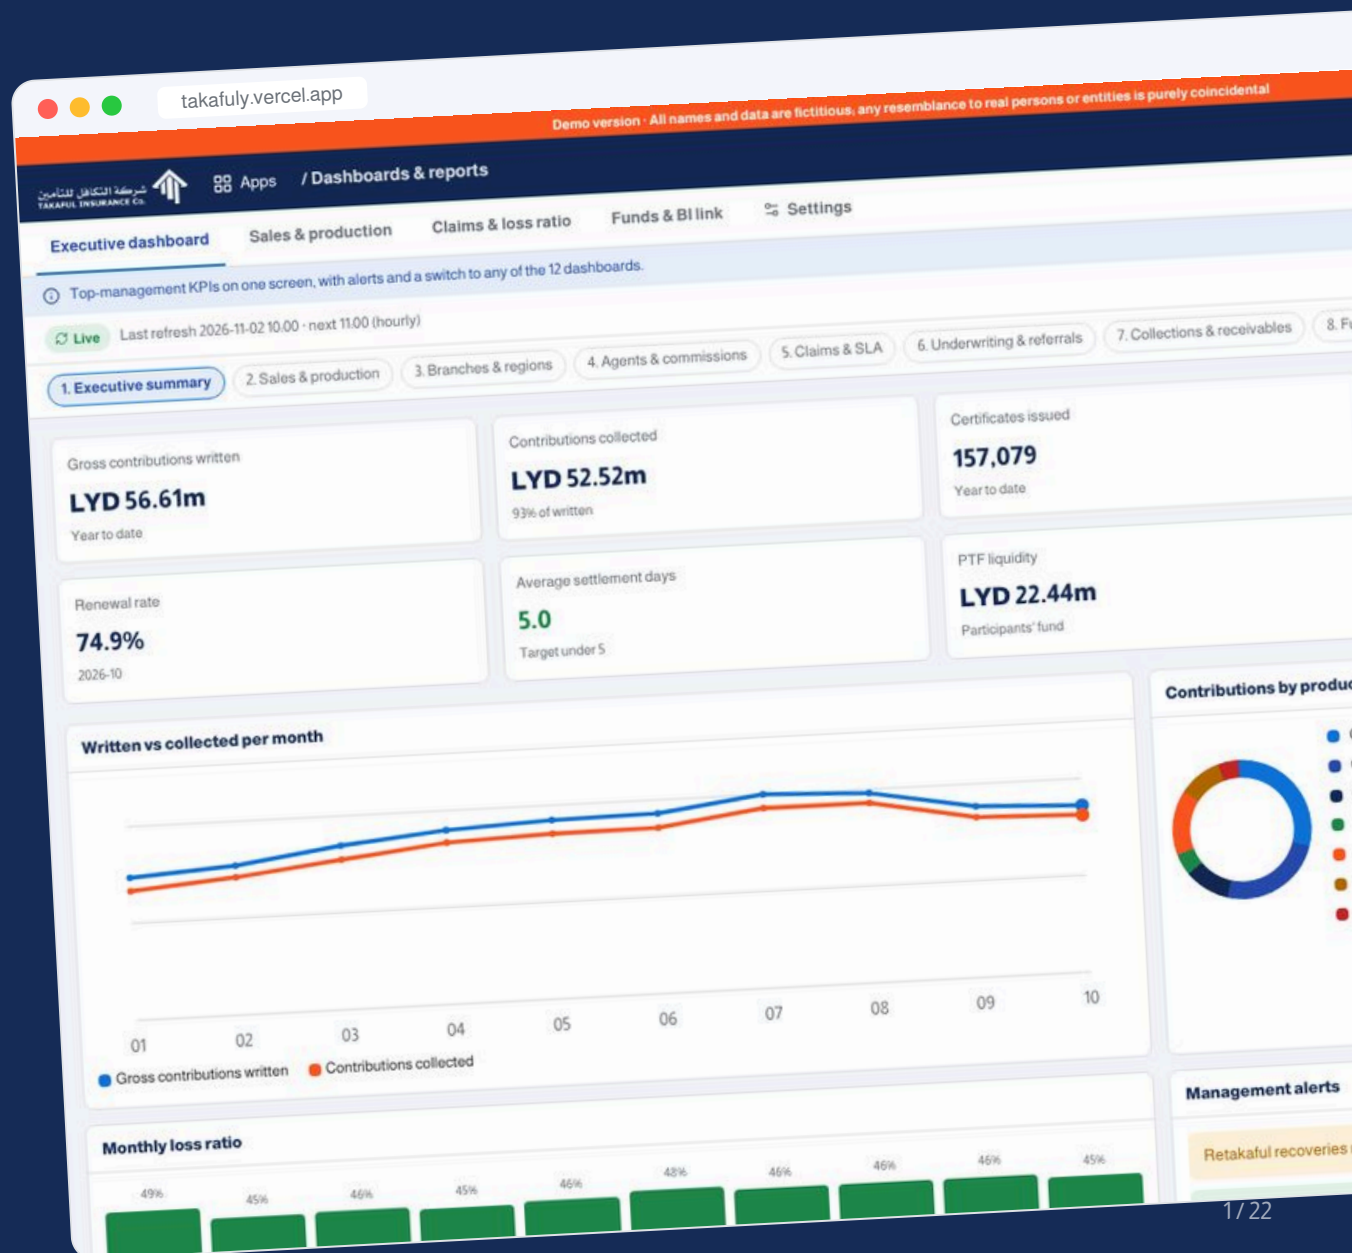

The Takaful Platform

An integrated takaful system for Takaful Insurance Company

Preview · November 2026

All names, figures and data in this demo are fictitious and for illustration only; any resemblance to real persons or entities is purely coincidental. Names are shortened on purpose: what matters is the job title and its access.

التَّأْمِينُ بِرُؤْيَةٍ شَرْعِيَّةٍ

Fourteen modules, one platform

The twelve modules in your proposal, plus HR and payroll.

Customer management

Policy issue & renewal

Underwriting & risk

Claims

Retakaful

Contributions & billing

Agents & brokers

Accounting & Finance

Dashboards & reports

Sharia Compliance

Surplus & Distribution

Investment Funds

Human Resources

Payroll

Sensitive module

One participant's journey across every module

1

We register the customer and verify identity

Customer management

2

We underwrite and price instantly

Underwriting & risk

3

We issue a signed PDF with QR

Policy issue & renewal

4

We collect and split between the funds

Contributions & billing

5

We settle the claim in 6 stages

Claims

6

We recover the retakaful share

Retakaful

7

We distribute surplus to participants

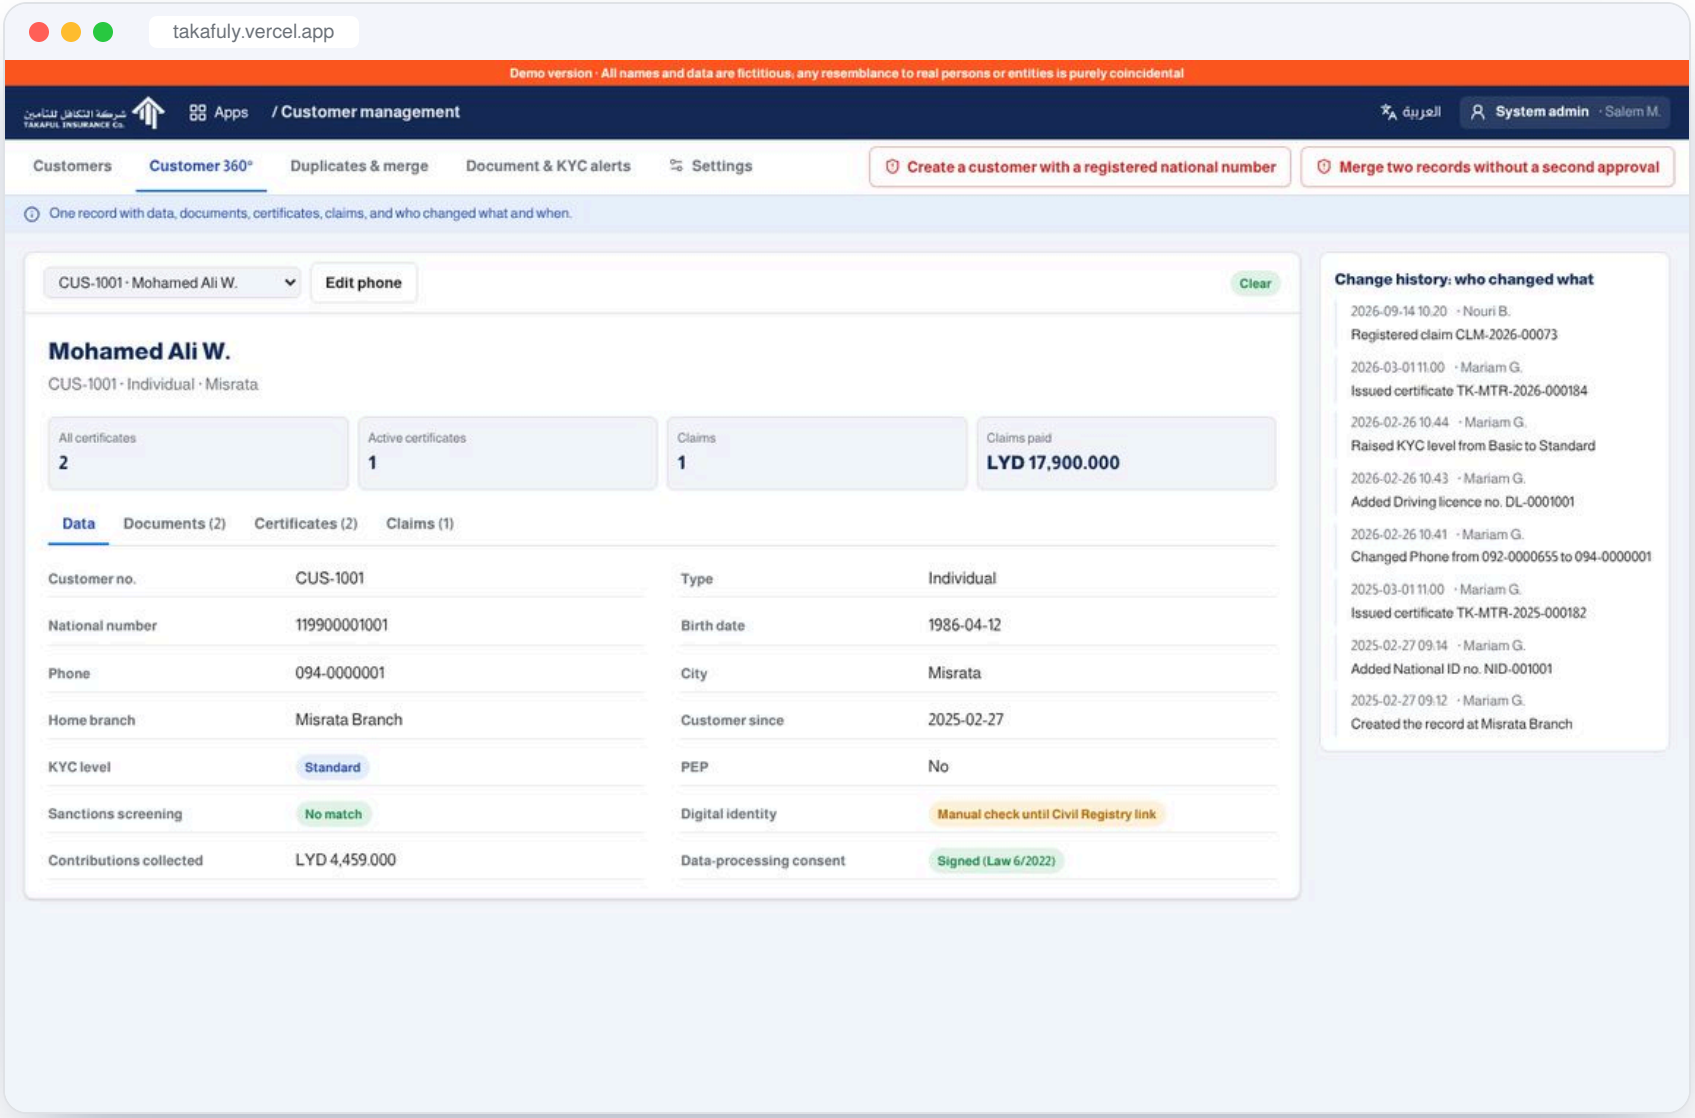

Surplus & Distribution

Customer management

One record per customer: documents, certificates, claims and every change

Proposal §3.1 · Sensitive module

- Customers
- Customer 360°
- Duplicates & merge
- Document & KYC alerts

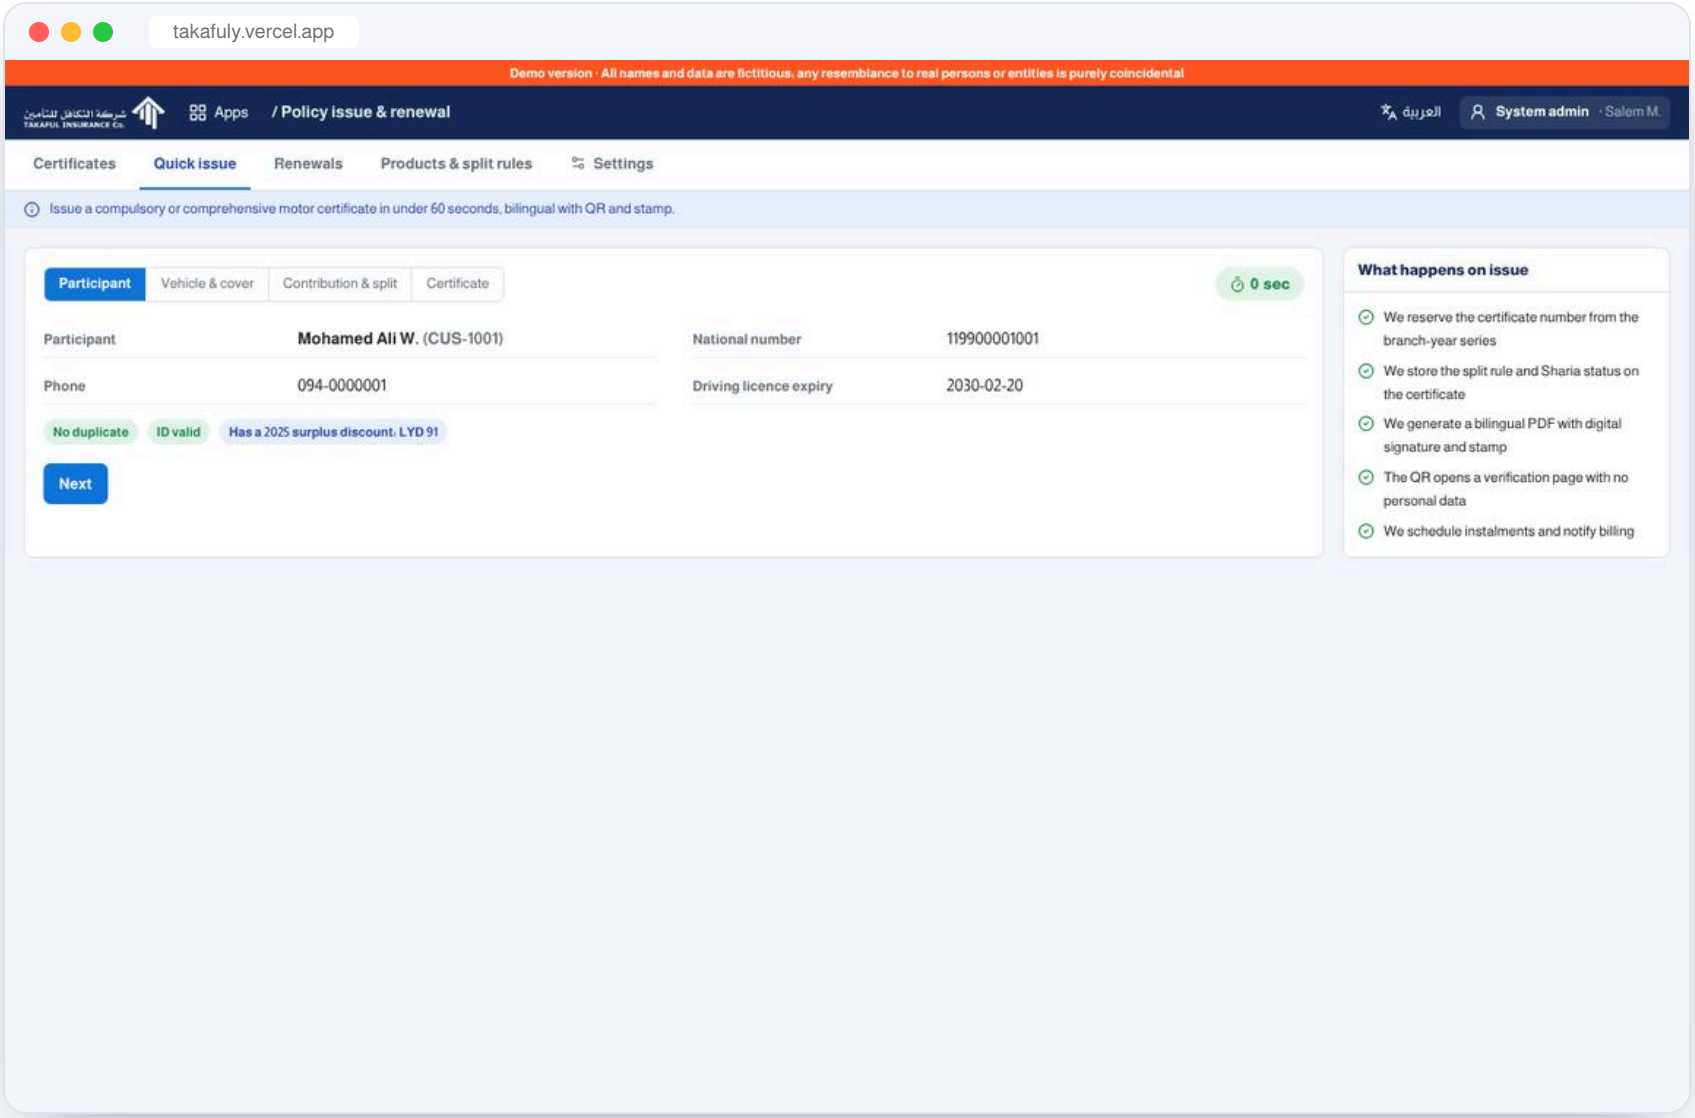

Policy issue & renewal

We issue a takaful certificate in a minute and remind customers 30 days before expiry

Proposal §3.2

- Certificates
- Quick issue
- Renewals
- Products & split rules

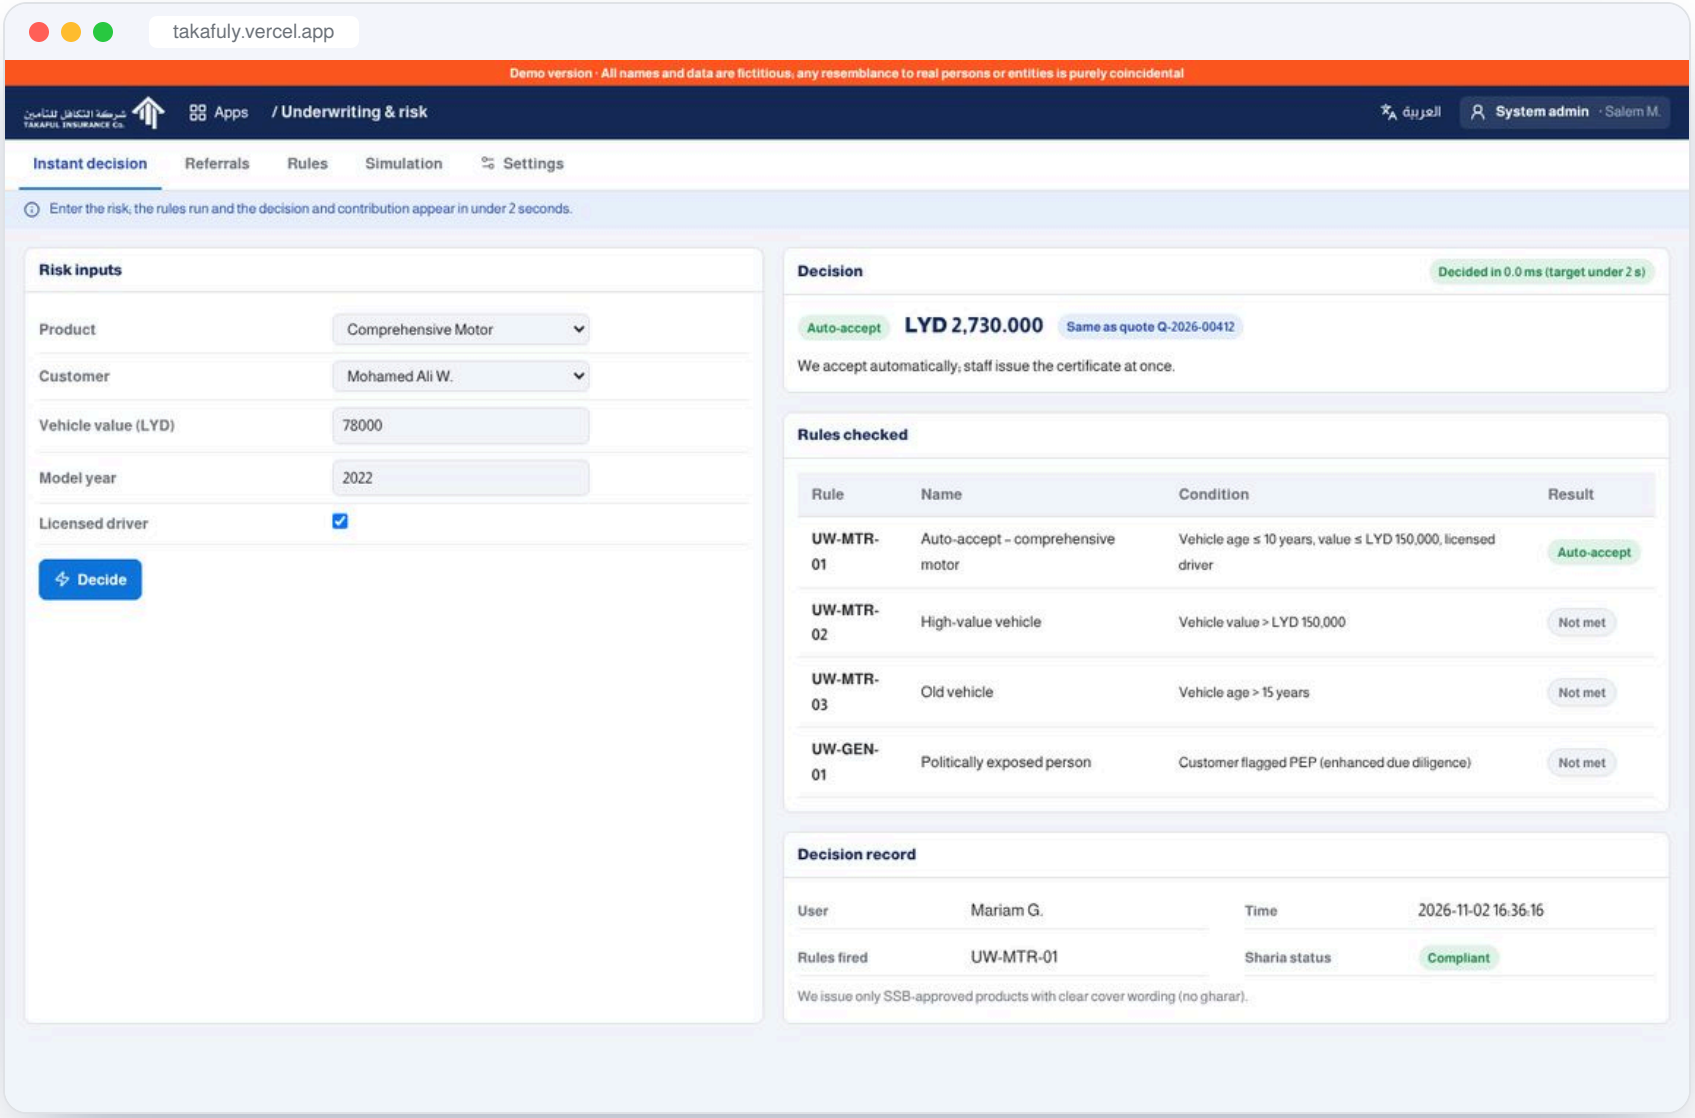

Underwriting & risk

Instant decisions for normal cases; complex ones go to the approval matrix

Proposal §3.3

- **Instant decision**
- **Referrals**
- **Rules**
- **Simulation**

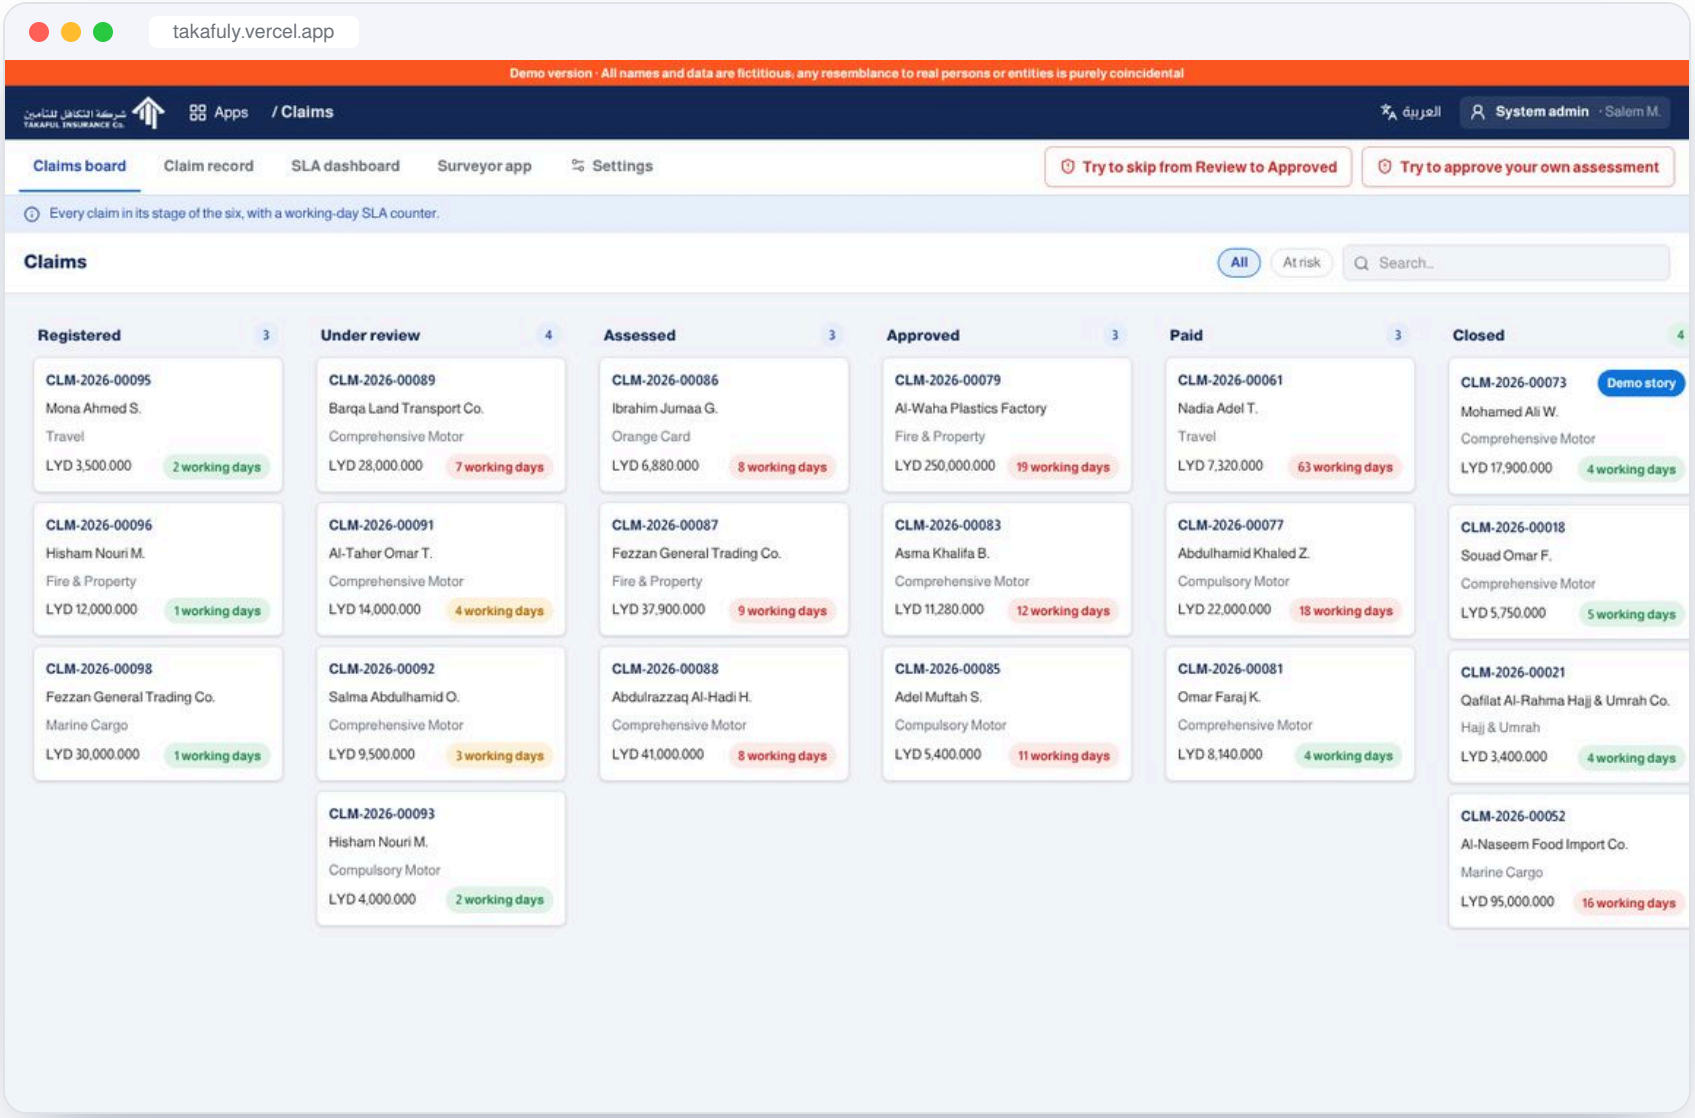

Claims

Six strict stages; paid in under 5 working days

Proposal §3.4

Sensitive module

- Claims board
- Claim record
- SLA dashboard
- Surveyor app

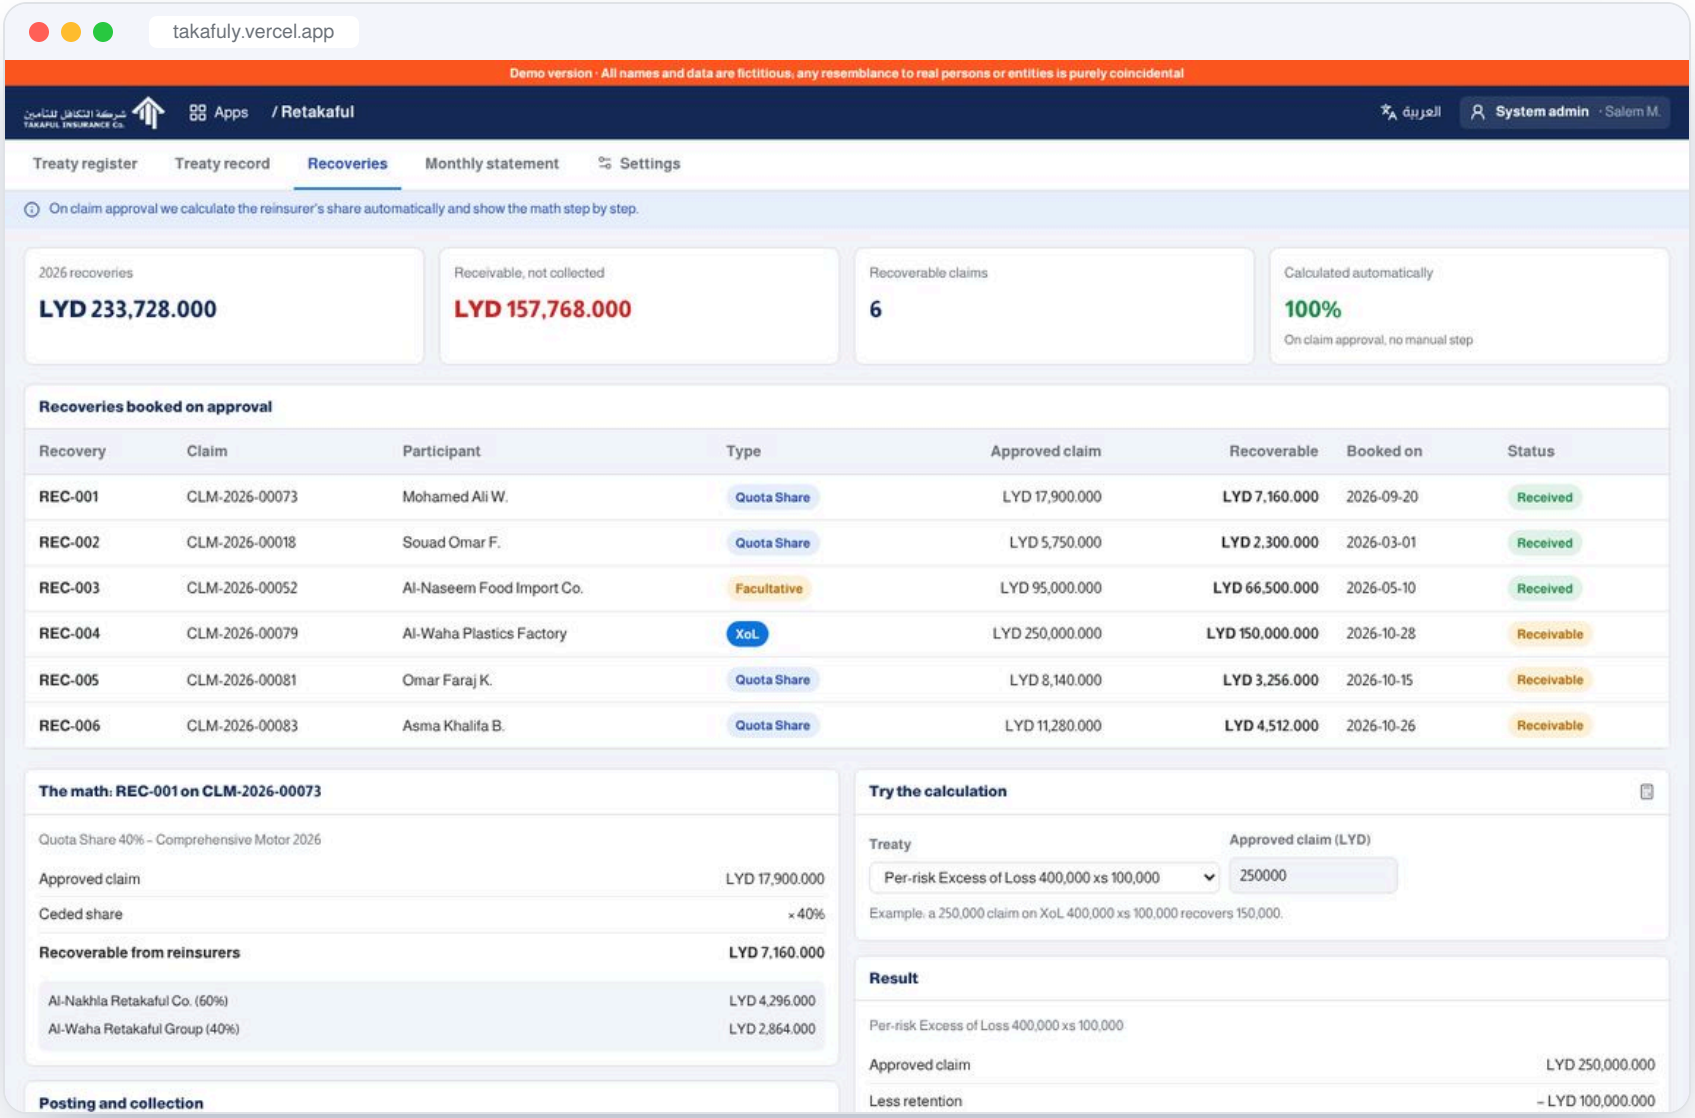

Retakaful

Treaties, automatic cessions and recoveries, monthly reconciliation

Proposal §3.5

- Treaty register
- Treaty record
- Recoveries
- Monthly statement

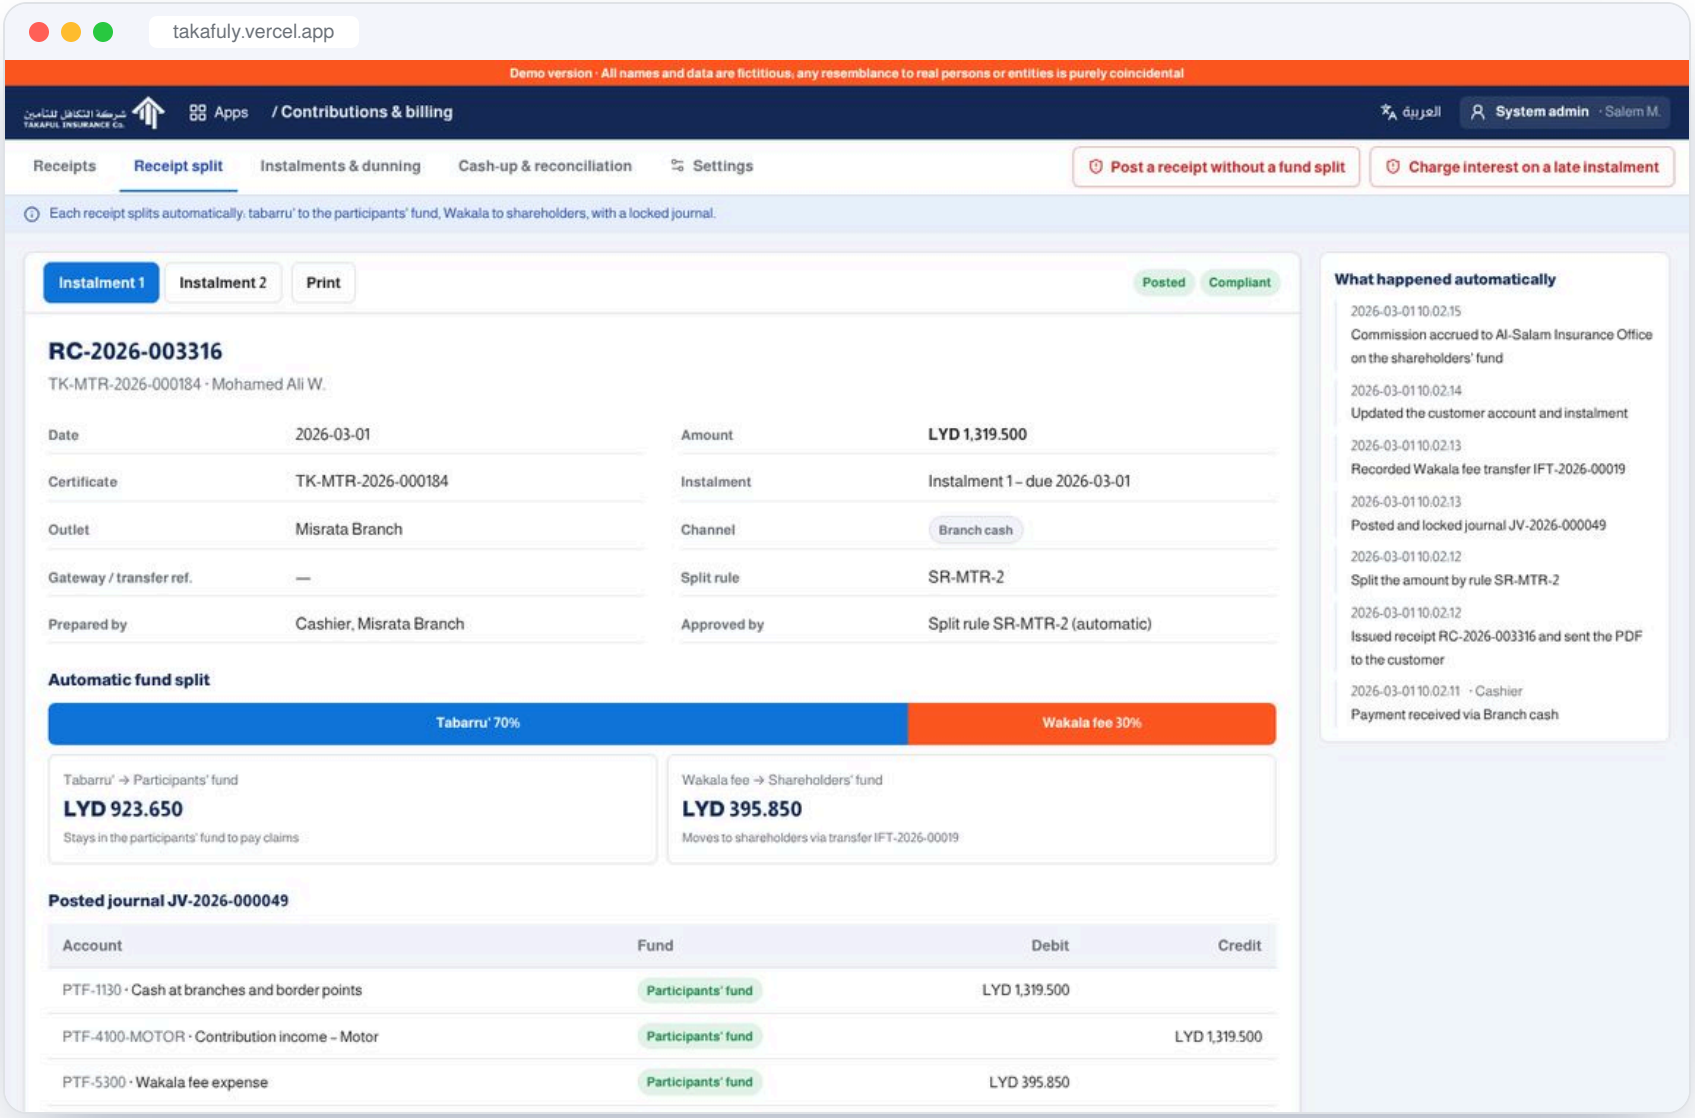

Contributions & billing

We collect contributions on every channel and split them between the funds automatically

Proposal §3.6 · Sensitive module

- Receipts
- **Receipt split**
- Instalments & dunning
- Cash-up & reconciliation

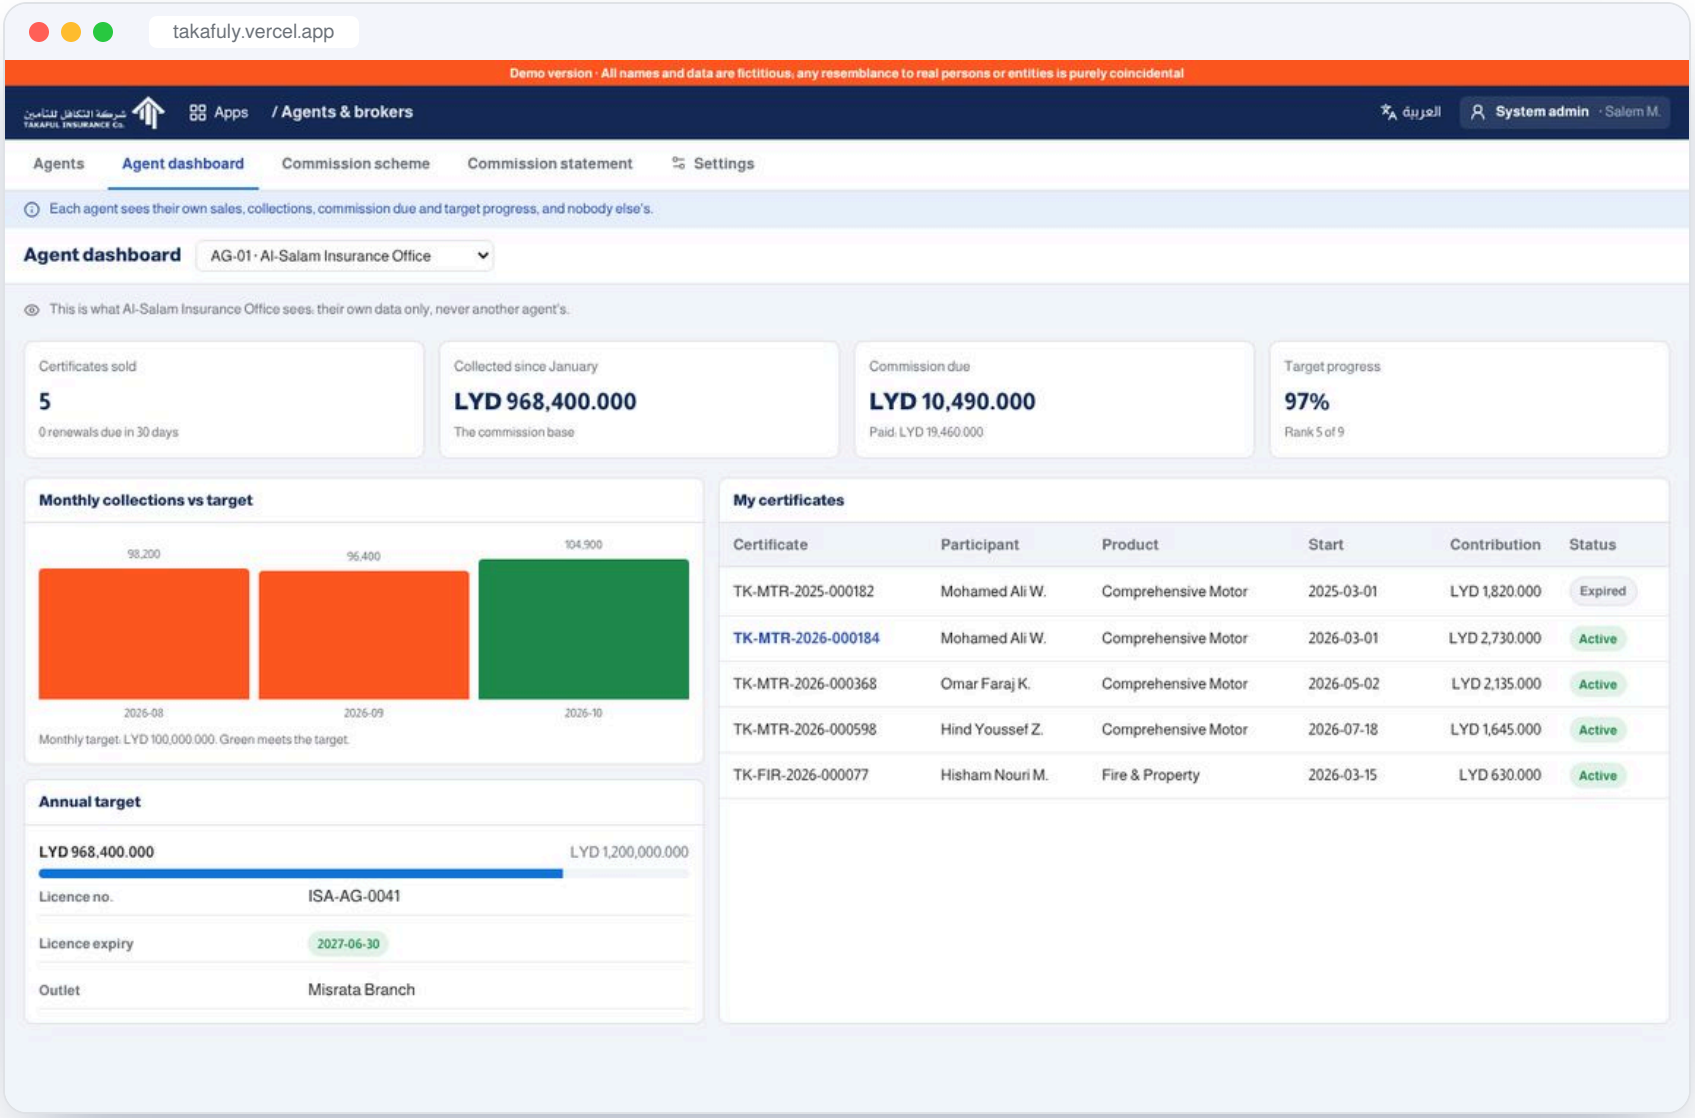

Agents & brokers

A dashboard per agent and tiered commission on collected business only

Proposal §3.7

- Agents
- Agent dashboard
- Commission scheme
- Commission statement

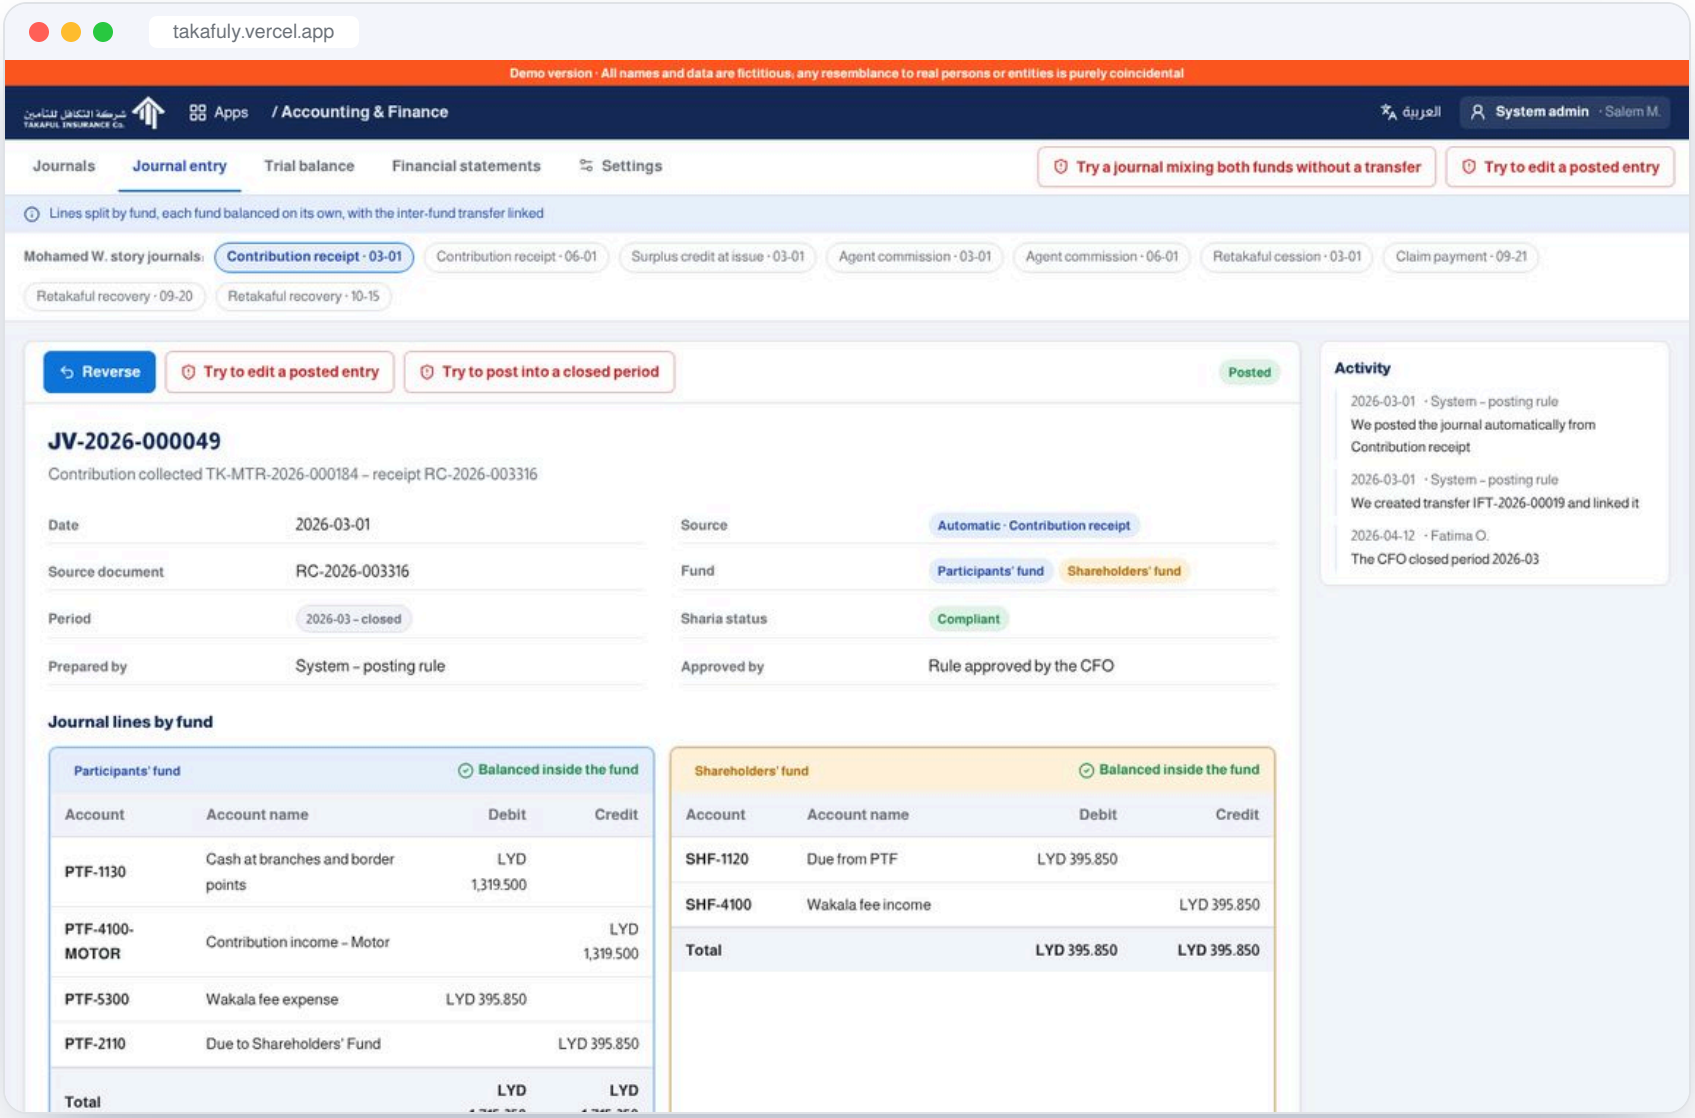

Accounting & Finance

Automatic journals for every action, each fund balanced on its own, statements in one click

Proposal §3.8

Sensitive module

- Journals
- Journal entry
- Trial balance
- Financial statements

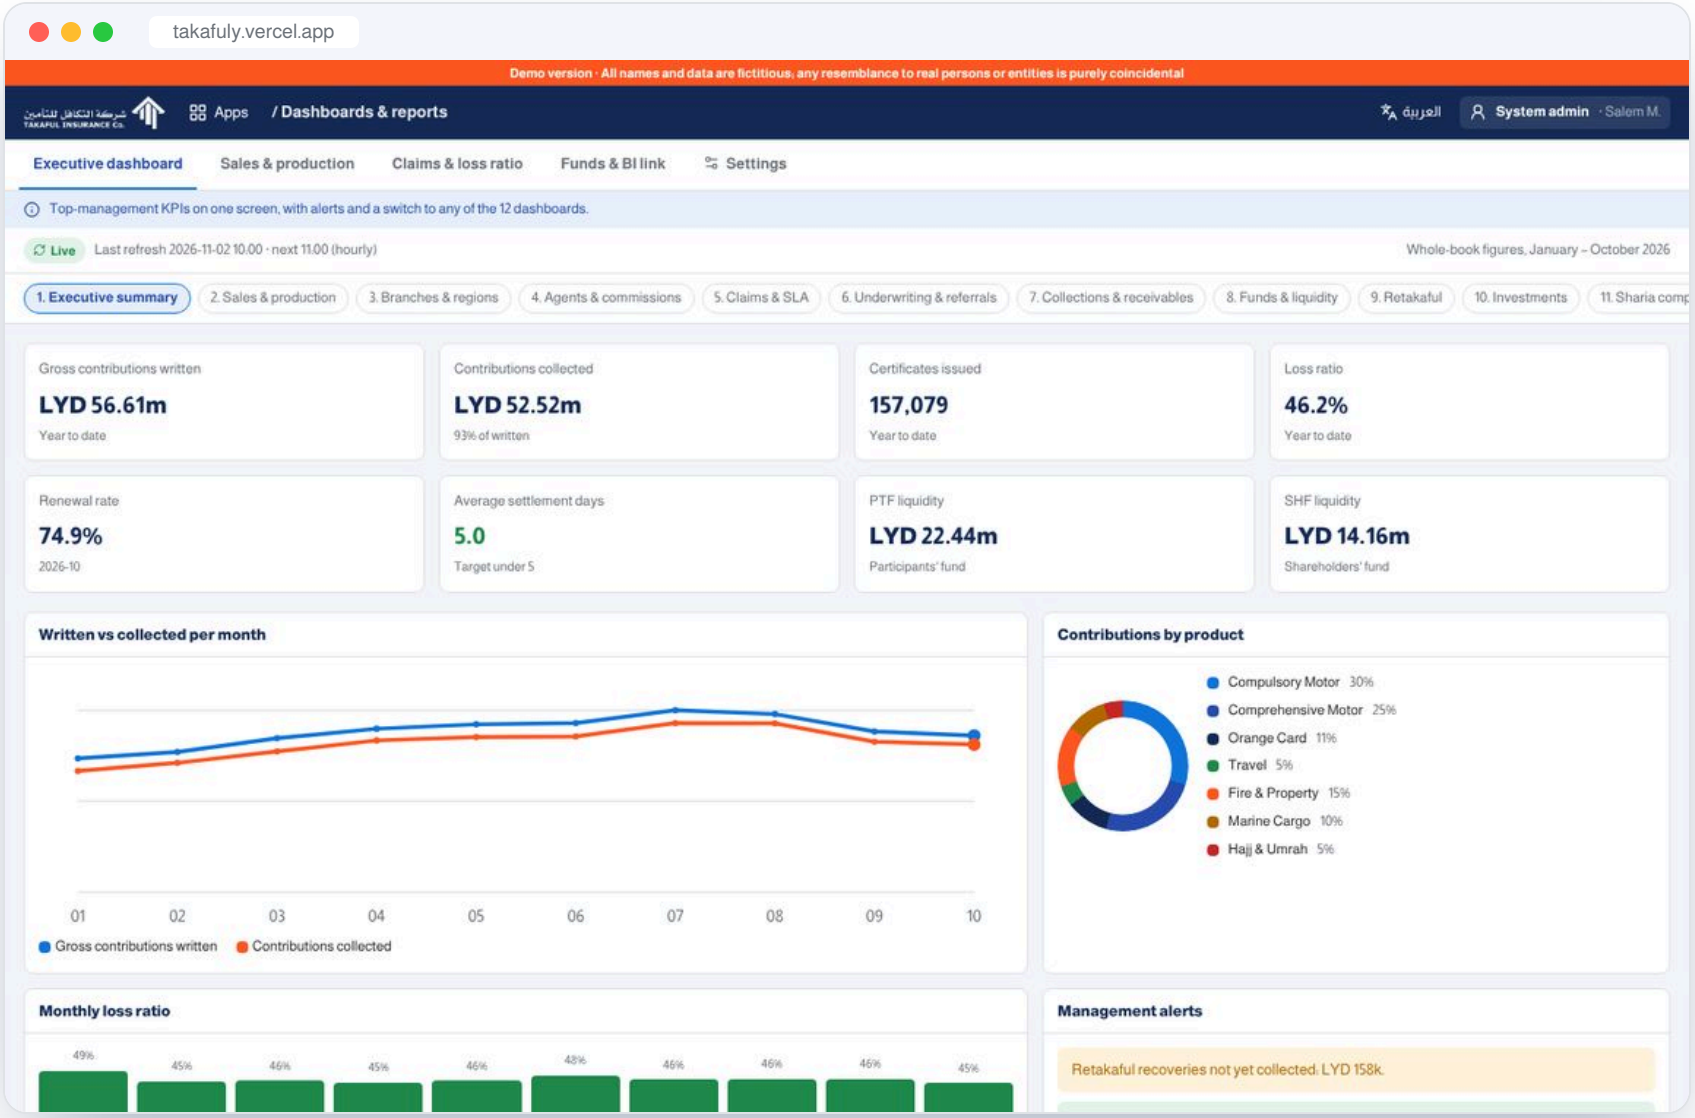

Dashboards & reports

24 KPIs and 12 interactive dashboards refreshed hourly, linked to Metabase or Power BI

Proposal §3.9

- **Executive dashboard**
- **Sales & production**
- **Claims & loss ratio**
- **Funds & BI link**

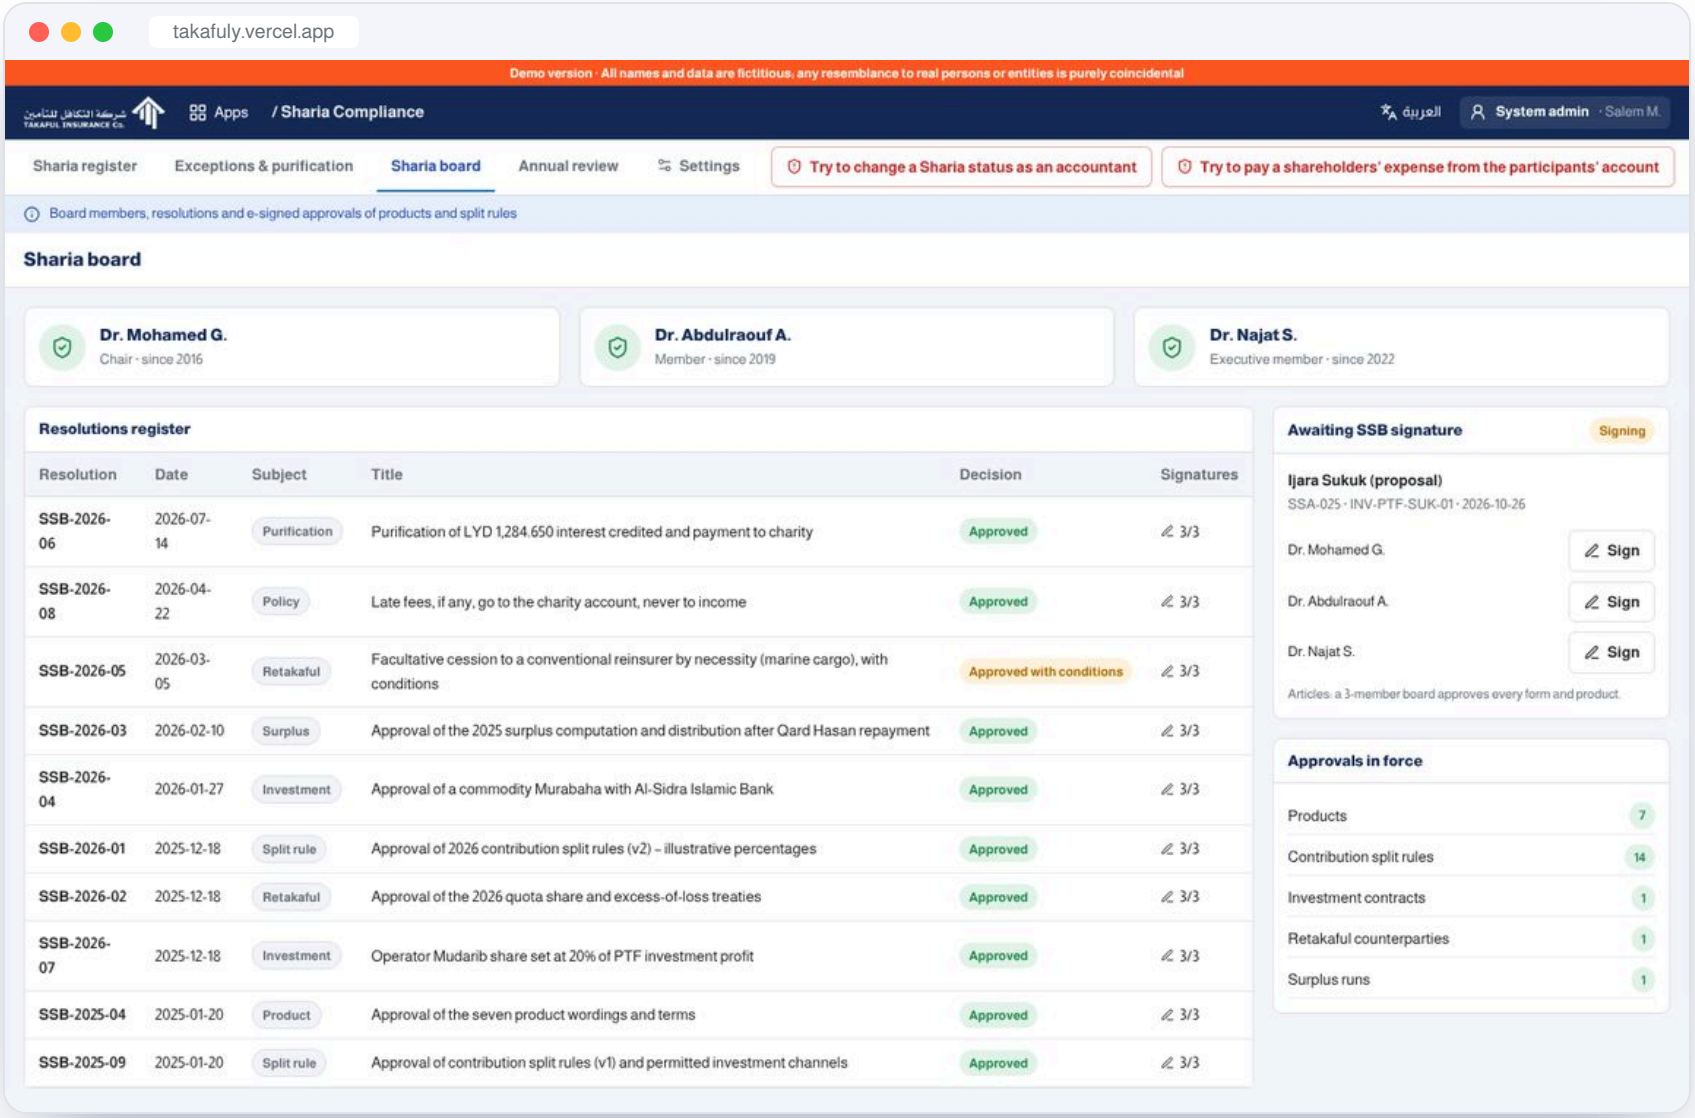

Sharia Compliance

Sharia status on every contract and transaction, exceptions log, SSB resolutions and the compliance certificate

Proposal §3.10 | Sensitive module

- Sharia register
- Exceptions & purification
- Sharia board
- Annual review

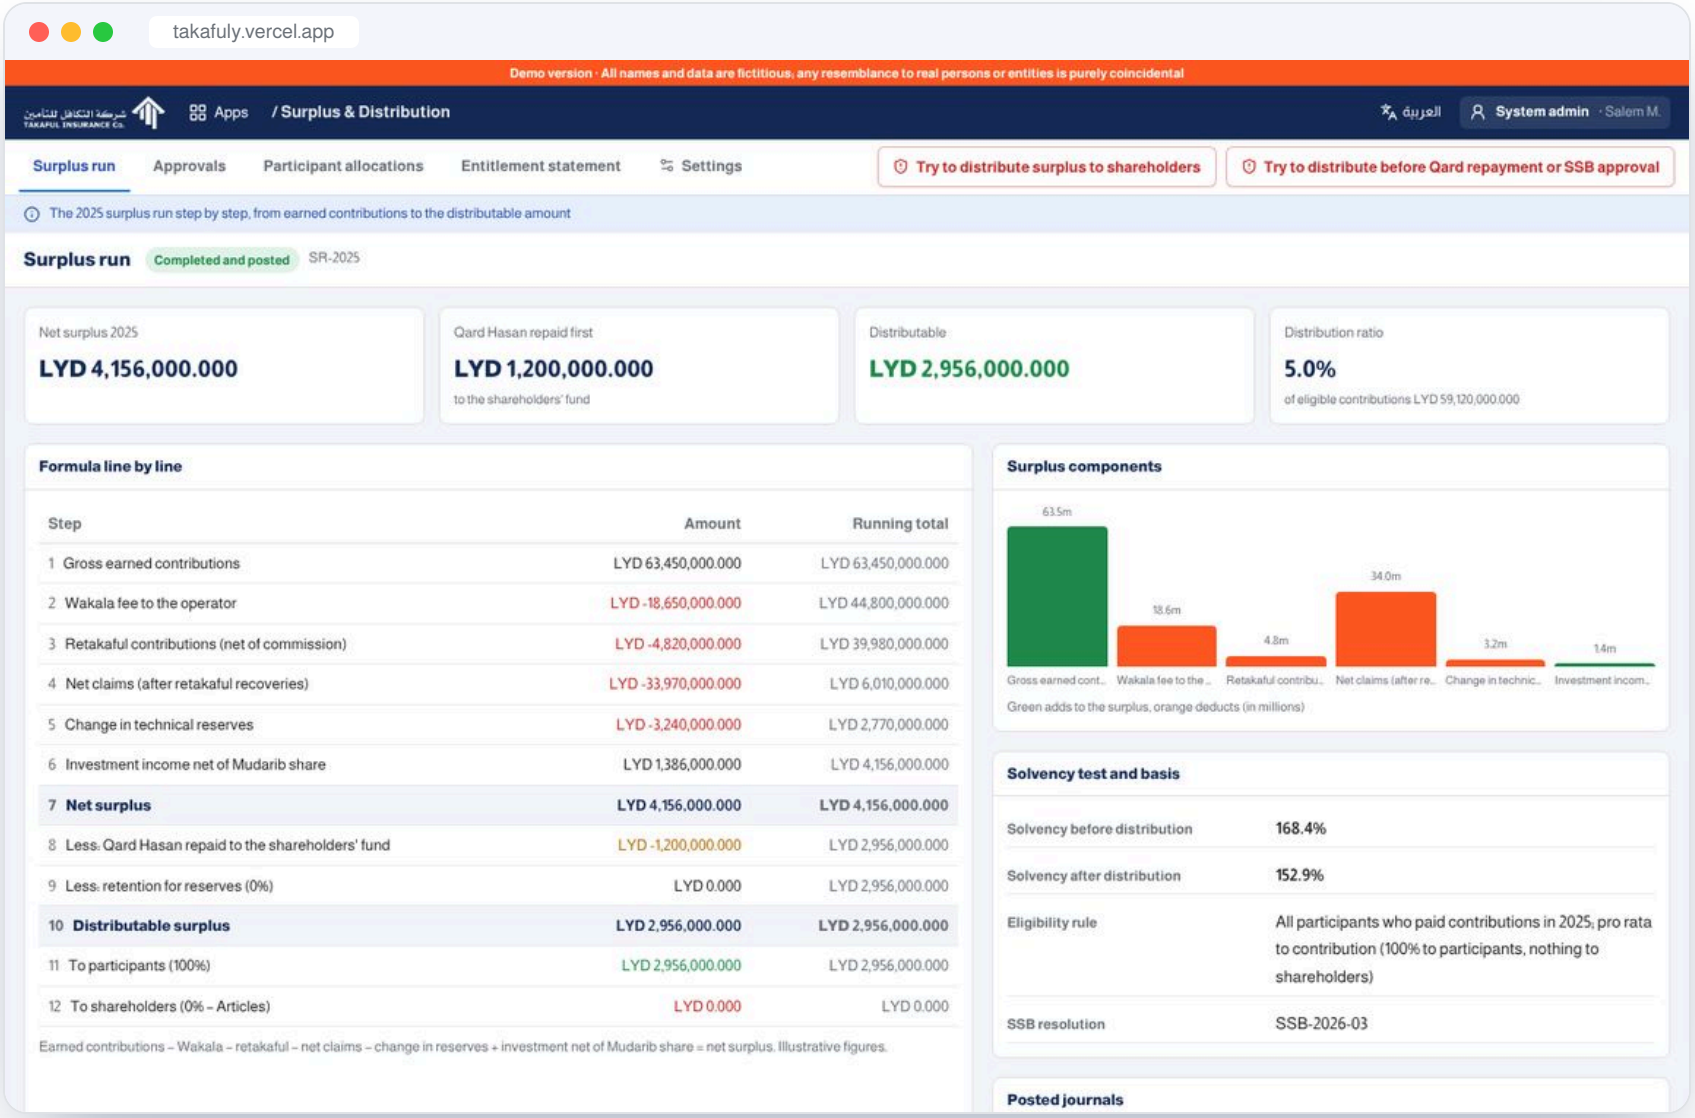

Surplus & Distribution

We compute the takaful surplus step by step and give 100% to participants pro rata

Proposal §3.11 | Sensitive module

- Surplus run
- Approvals
- Participant allocations
- Entitlement statement

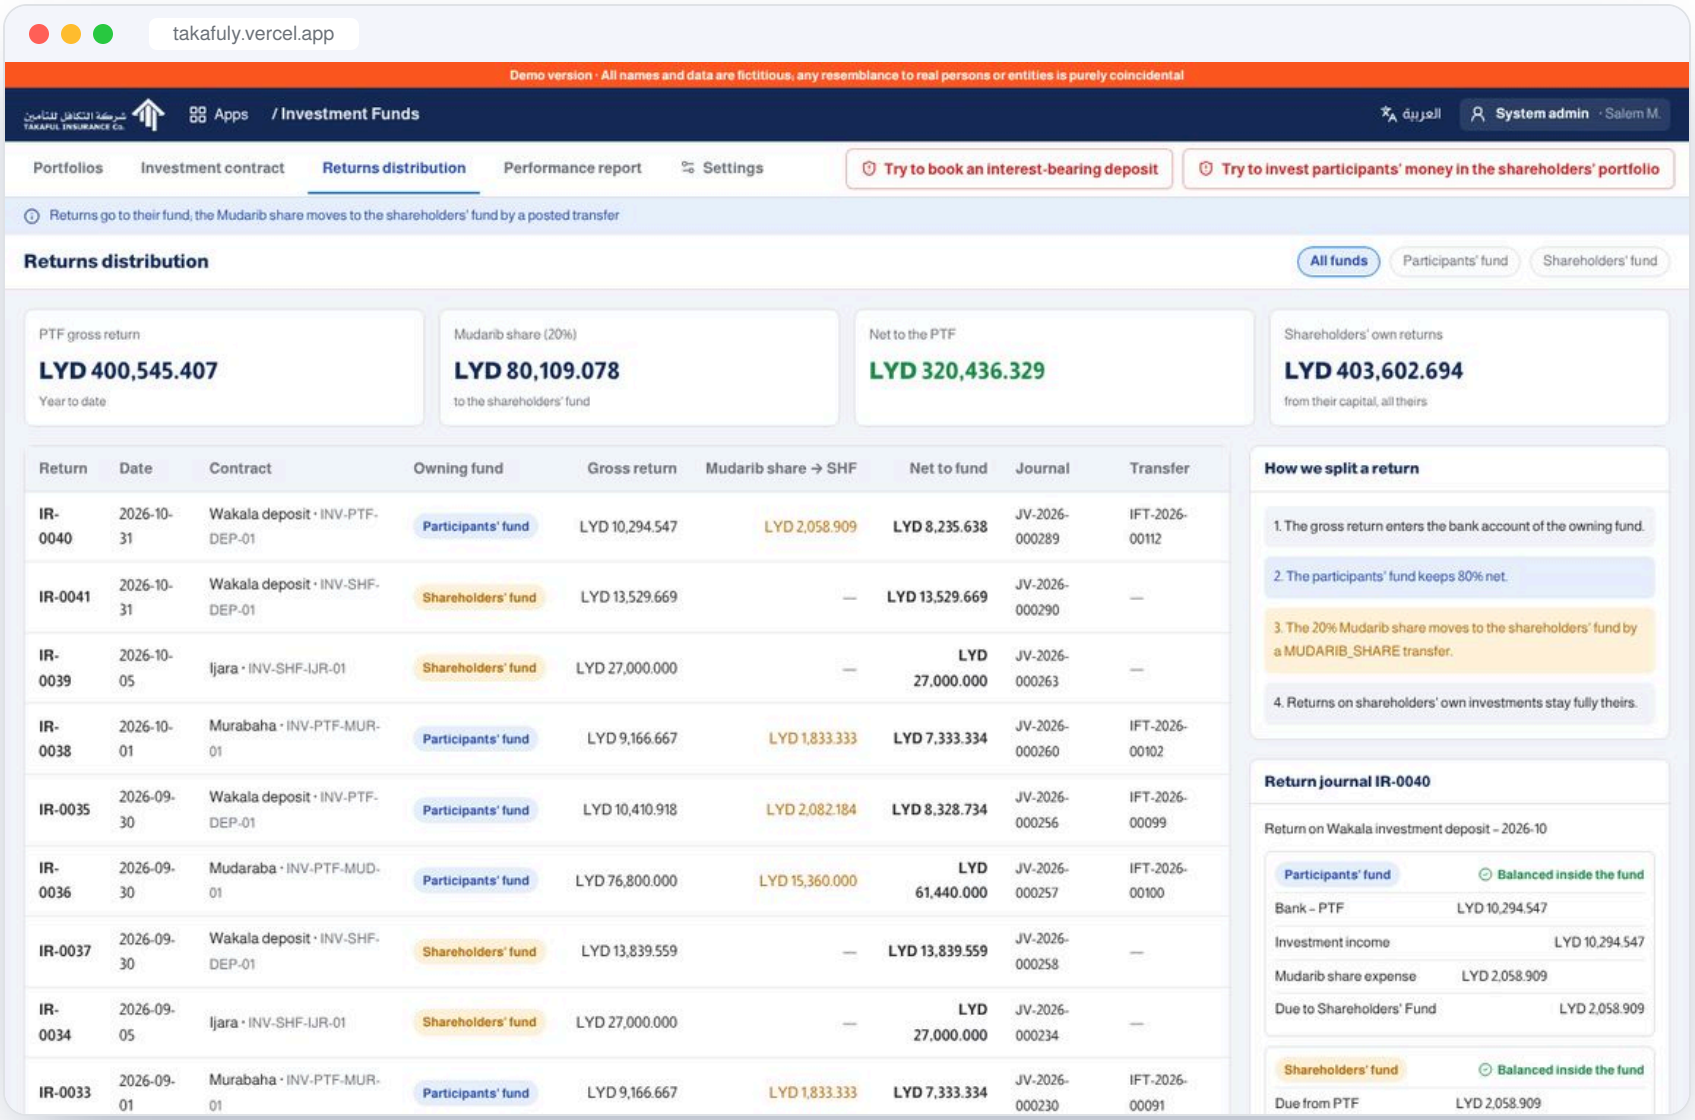

Investment Funds

Separate portfolios per fund with Murabaha, Mudaraba and Ijara, and returns split by the Mudarib share

Proposal §3.12 · Sensitive module

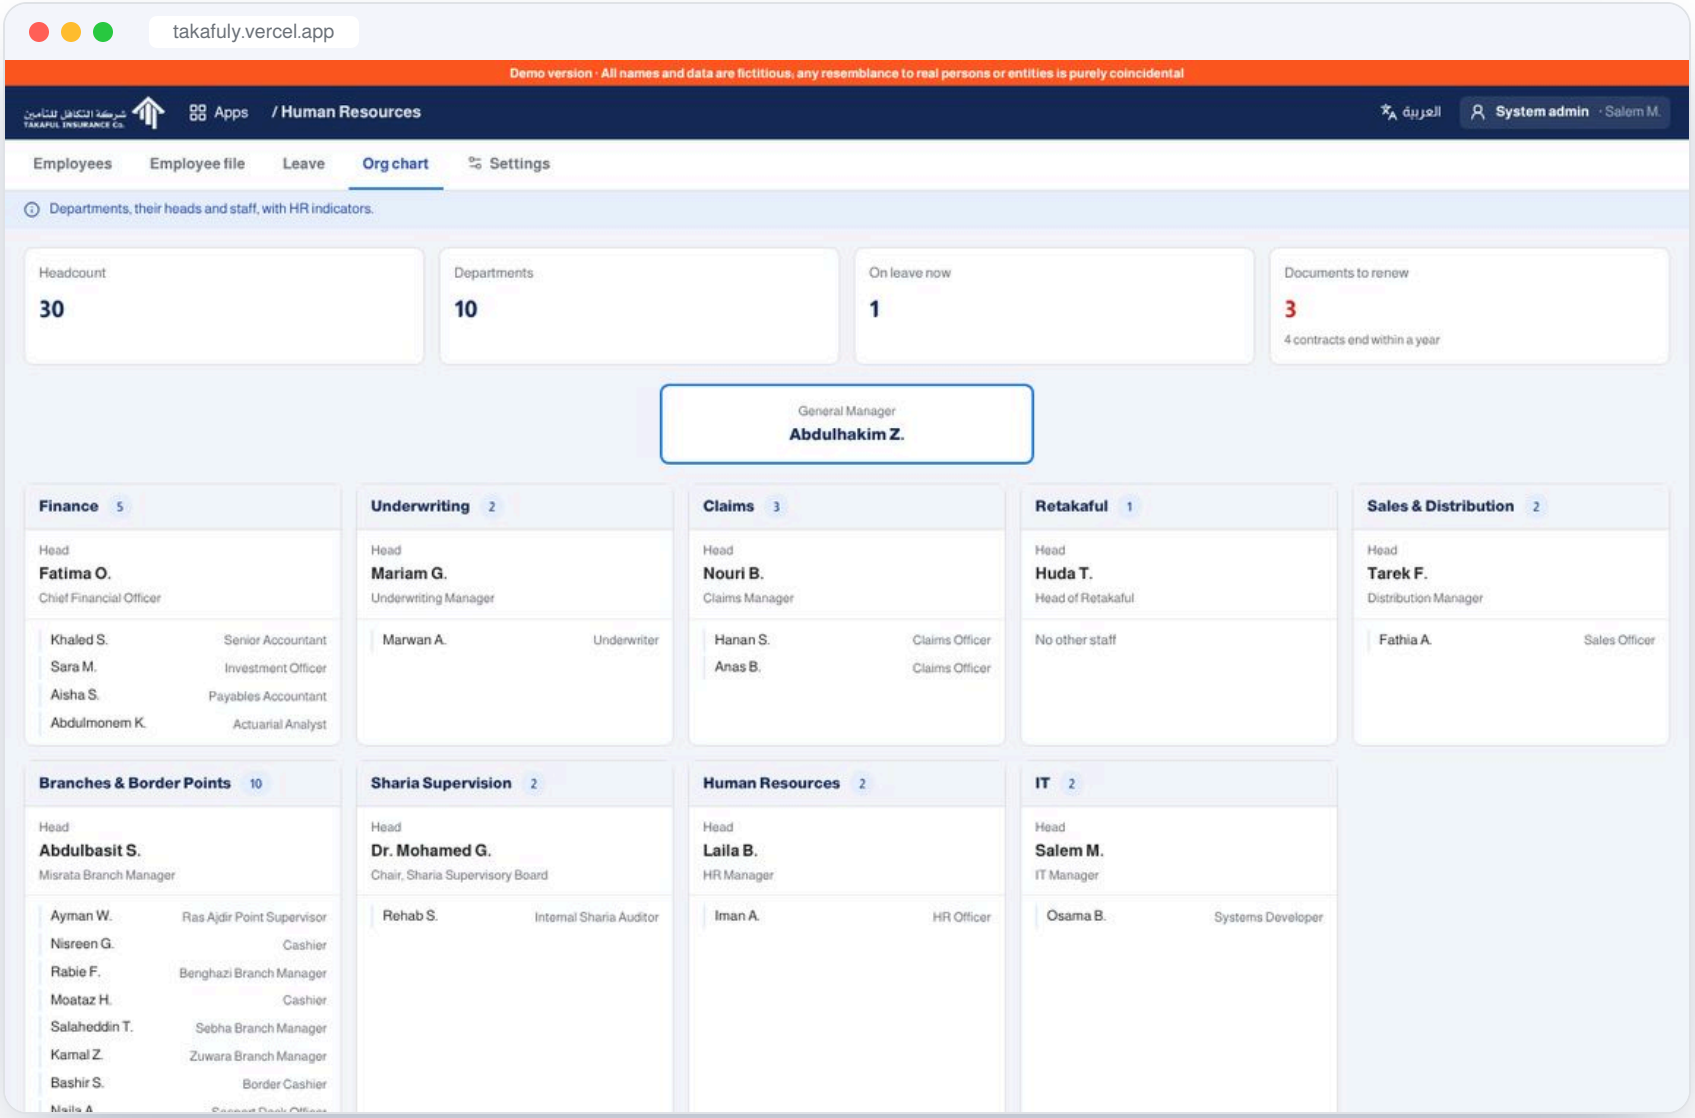

- Portfolios
- Investment contract
- Returns distribution
- Performance report

Human Resources

Staff files, contracts and leave; logins follow hiring

- Employees
- Employee file
- Leave
- Org chart

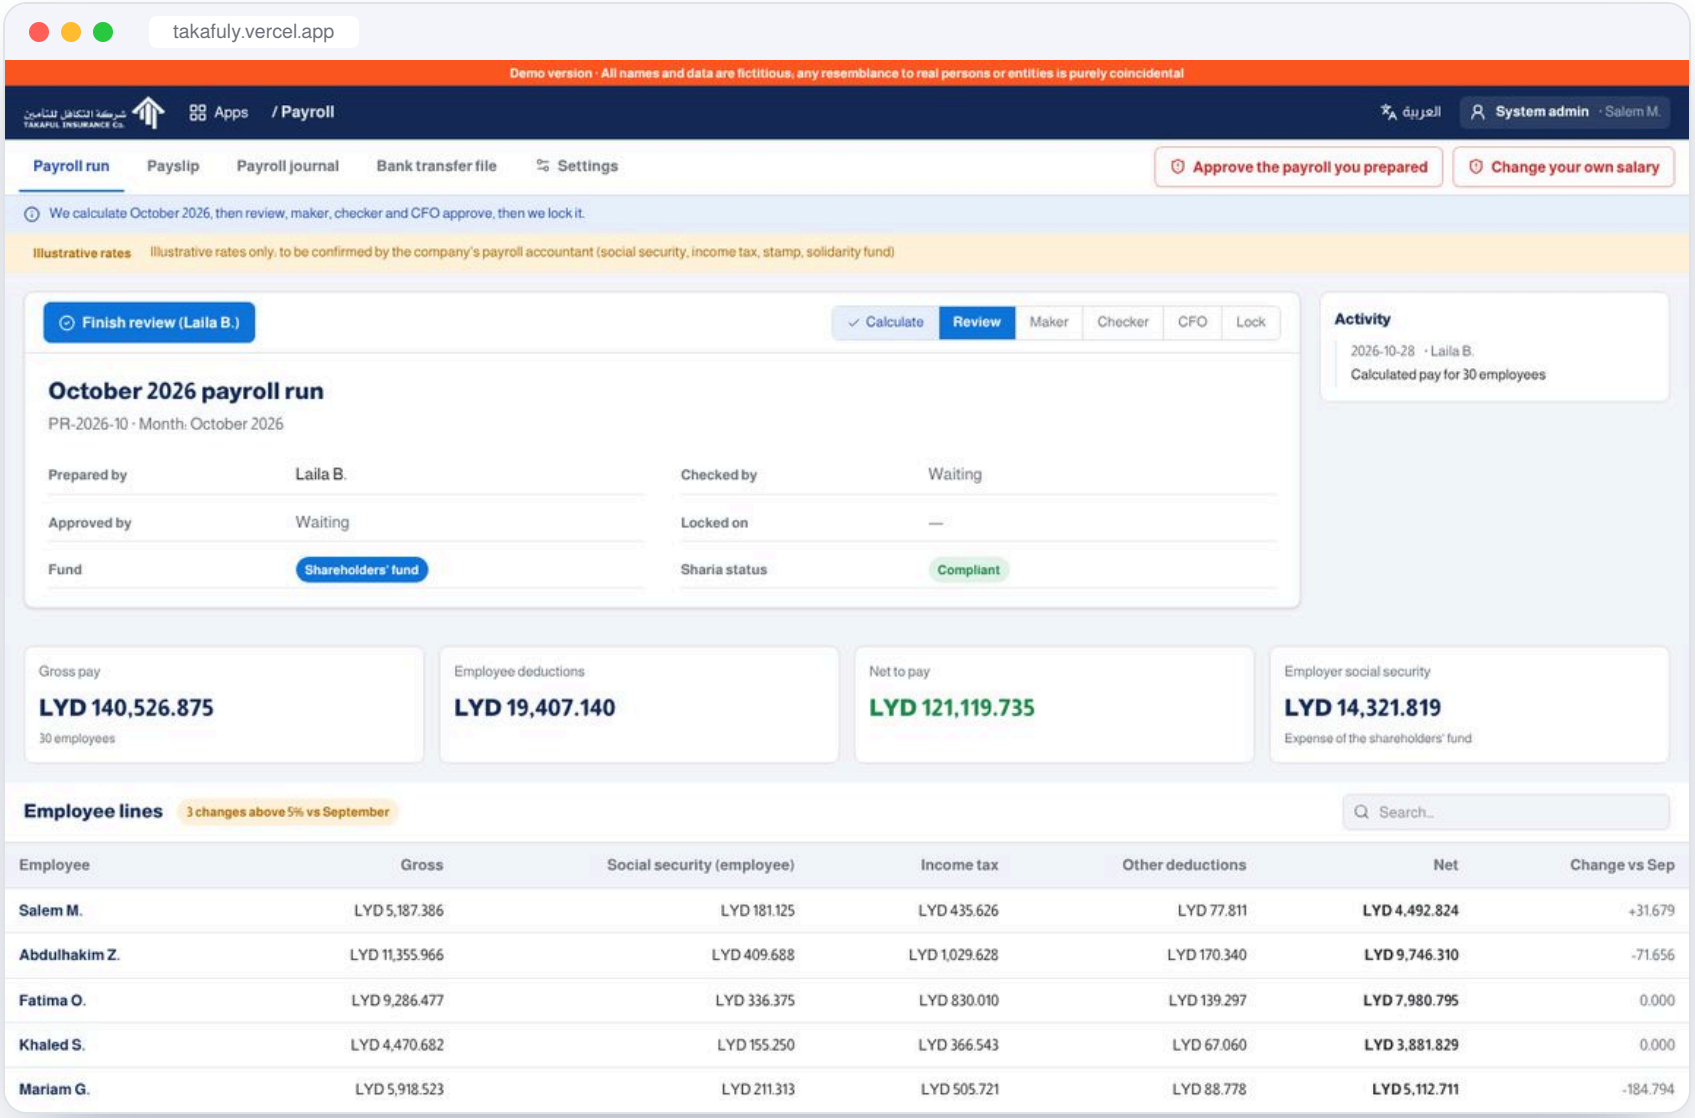

Payroll

Monthly run with maker-checker, posted to the shareholders' fund only

Sensitive module

- **Payroll run**
- **Payslip**
- **Payroll journal**
- **Bank transfer file**

Sensitive modules and how we protect them

The database itself refuses the mistake, not only the screen.

Customer management

We block saving on a matching national number and show the existing record

Claims

Strict state machine: six stages in order in the API and database

Contributions & billing

Every receipt splits automatically by the certificate's approved split rule

Accounting & Finance

Every journal line carries one fund; the account belongs to that fund

Sharia Compliance

Sharia status is mandatory on every contract and transaction; never empty

Surplus & Distribution

A fixed formula shown line by line, no manual figures

Investment Funds

Every contract and counterparty needs an SSB resolution before booking

Payroll

Whoever prepares the run cannot approve it: checker, then CFO

Hosting on your servers or in the cloud

One Docker package

Application

Background worker

Database
