Fourteen modules, one platform

The twelve modules of the technical proposal, plus HR and payroll.

Customer management

Policy issue & renewal

Underwriting & risk

Claims

Retakaful

Contributions & billing

Agents & brokers

Accounting & Finance

Dashboards & reports

Sharia Compliance

Surplus & Distribution

Investment Funds

Human Resources

Payroll

Sensitive module

The participant's journey through the platform

1 Customer sign-up and identity check

Customer management

2 Instant rule-based underwriting

Underwriting & risk

3 Signed PDF policy with QR code

Policy issue & renewal

4 Contribution collected and split by fund

Contributions & billing

5 Claim settled in 6 stages

Claims

6 Automatic retakaful recovery

Retakaful

7 Surplus shared with participants

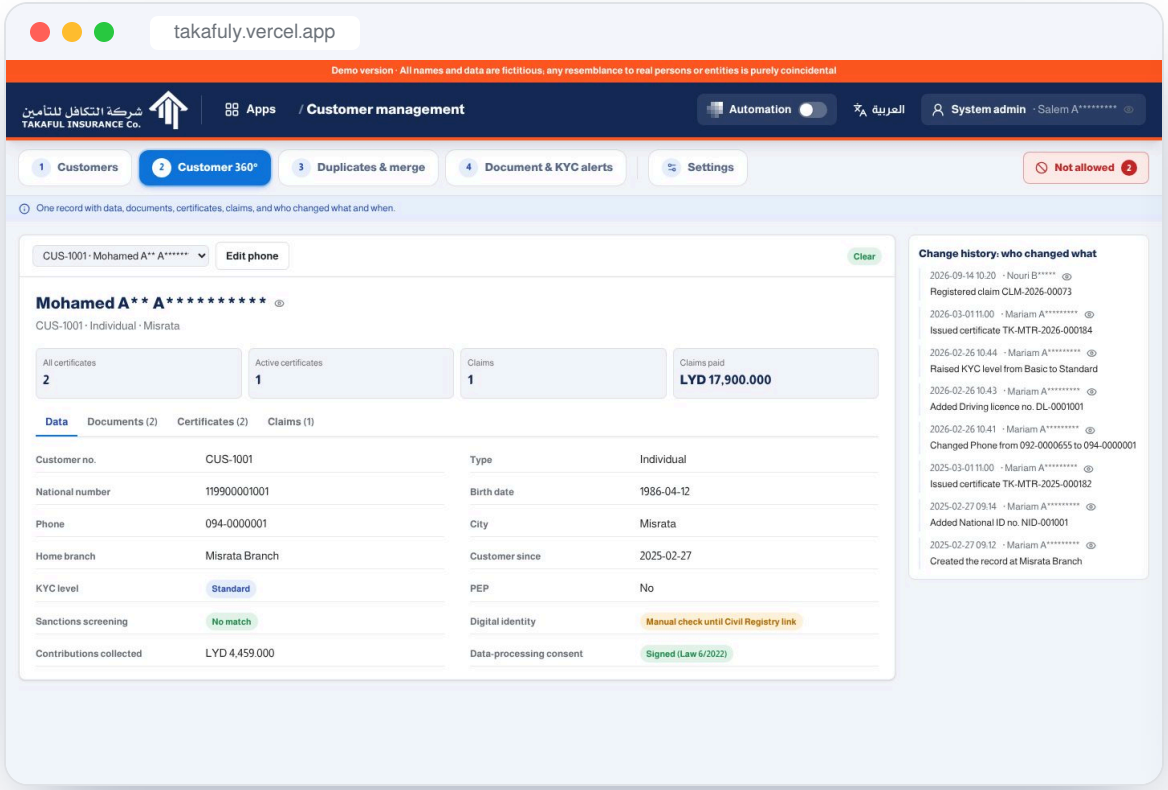

Surplus & Distribution

Customer management

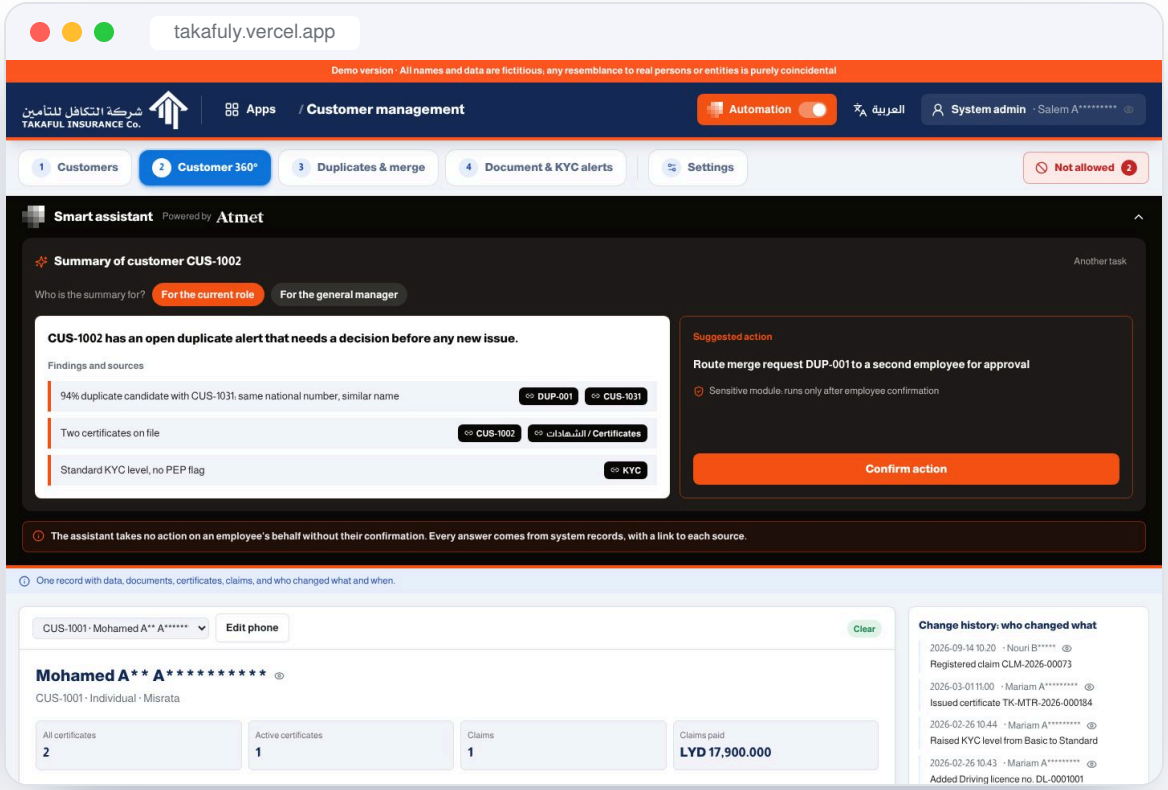

One record per customer: documents, certificates, claims and every change

Powered by Atmet

Before: automation off

After: automation on

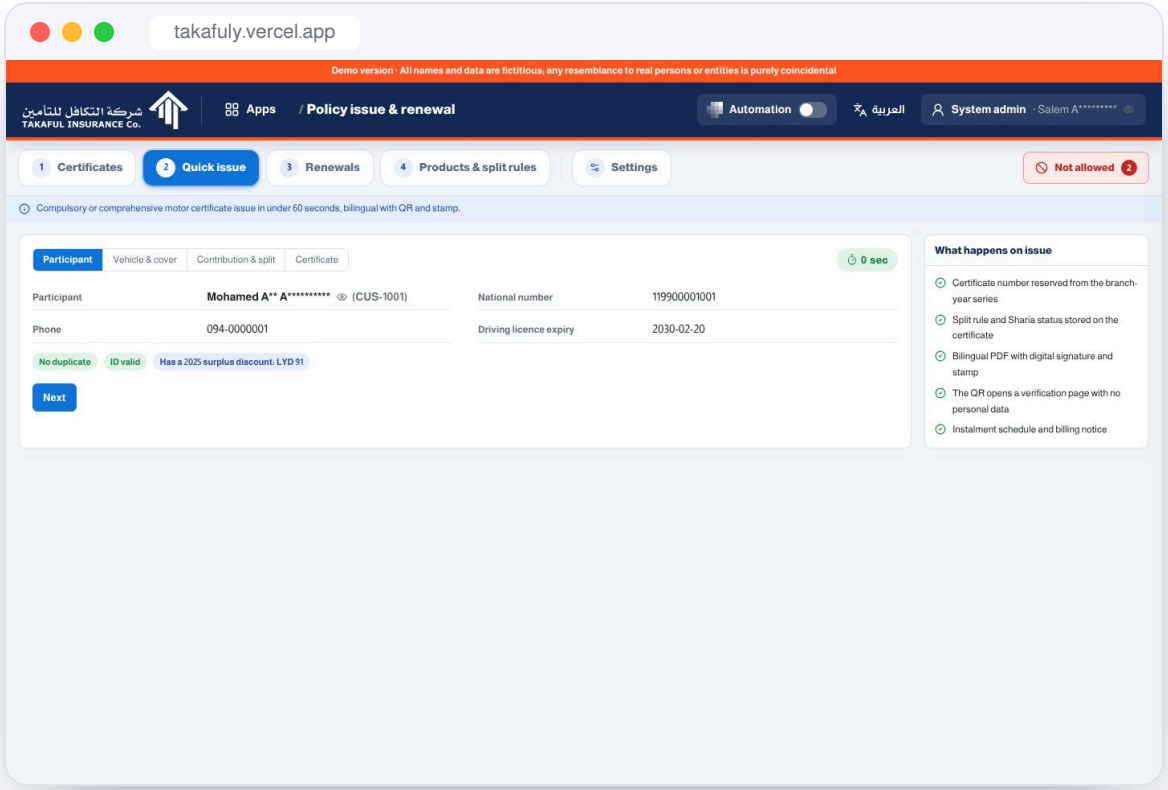

Policy issue & renewal

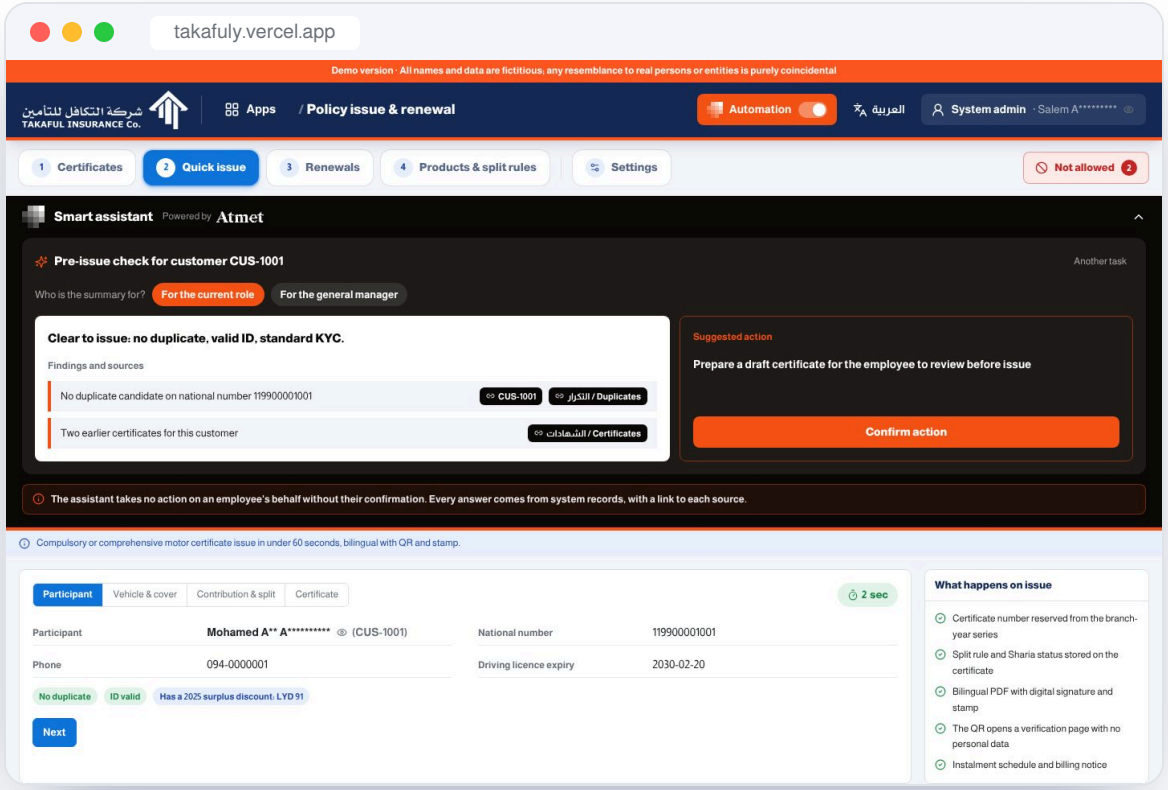

Takaful certificate issue in a minute, with a renewal reminder 30 days before expiry

Powered by Atmet

Before: automation off

After: automation on

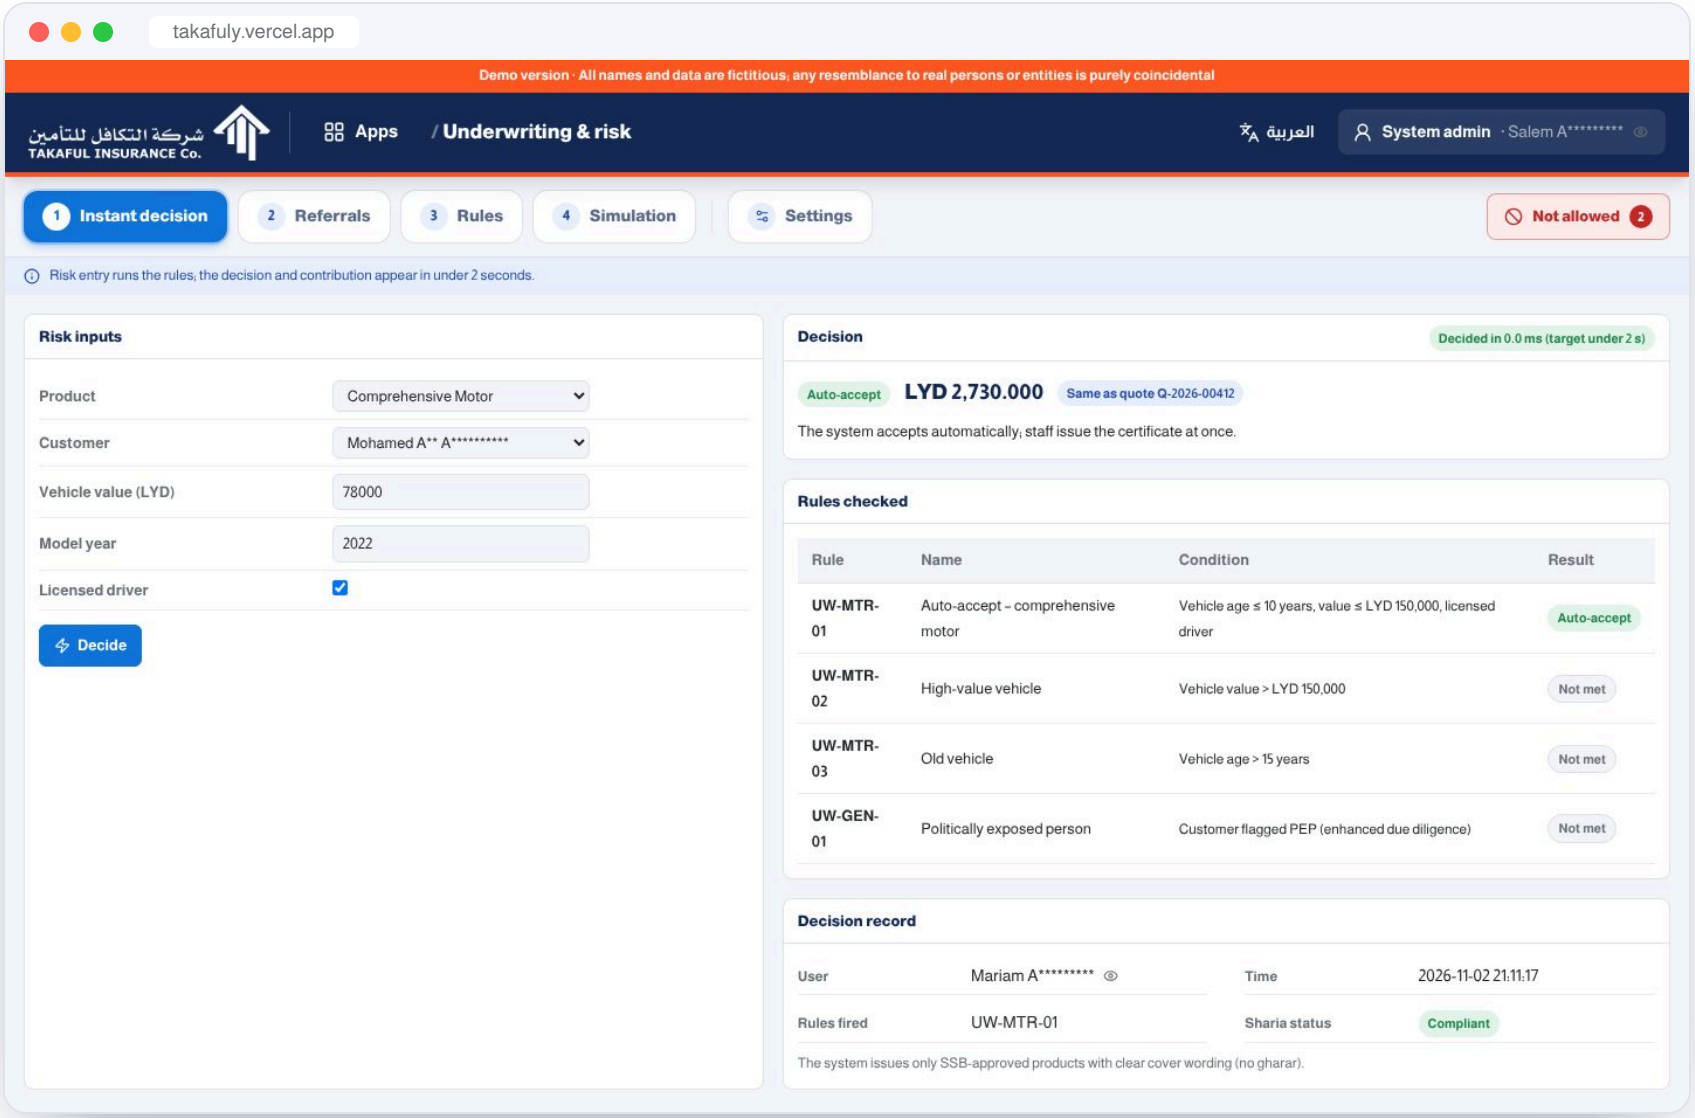

Underwriting & risk

Instant decisions for normal cases; complex ones go to the approval matrix

Proposal §3.3

- **Instant decision**
- **Referrals**
- **Rules**
- **Simulation**

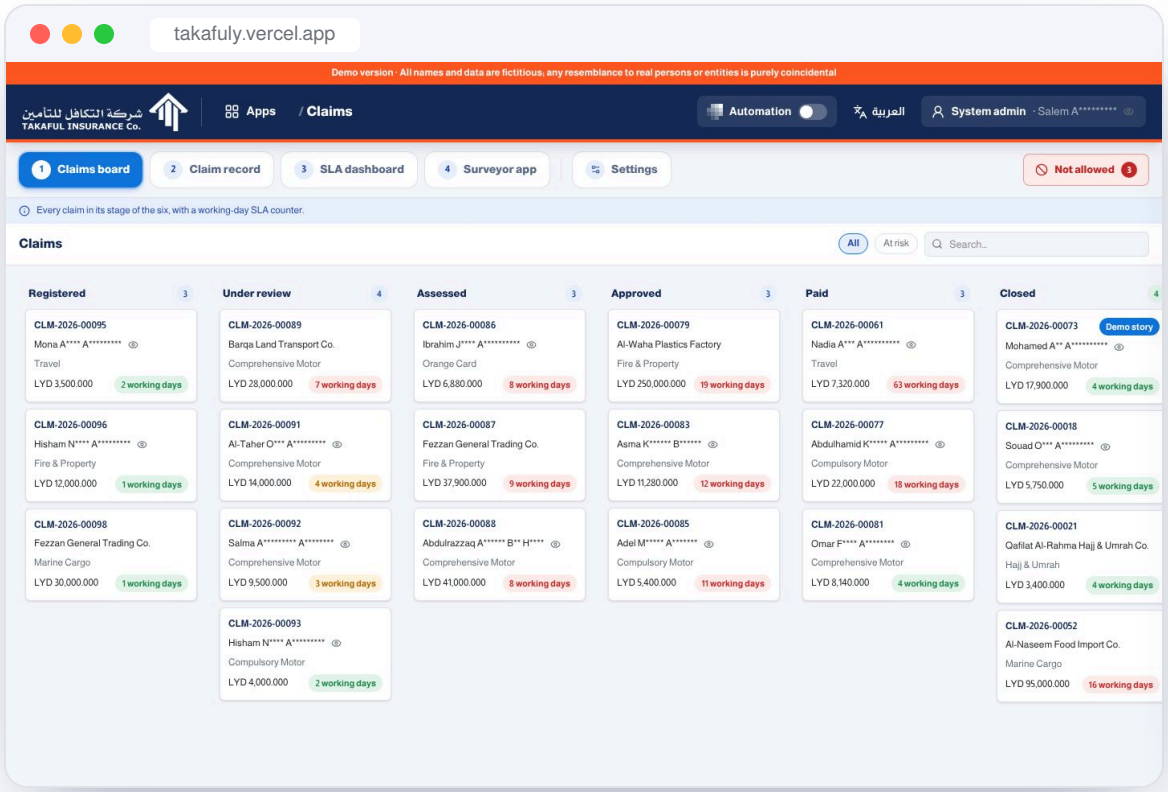

Claims

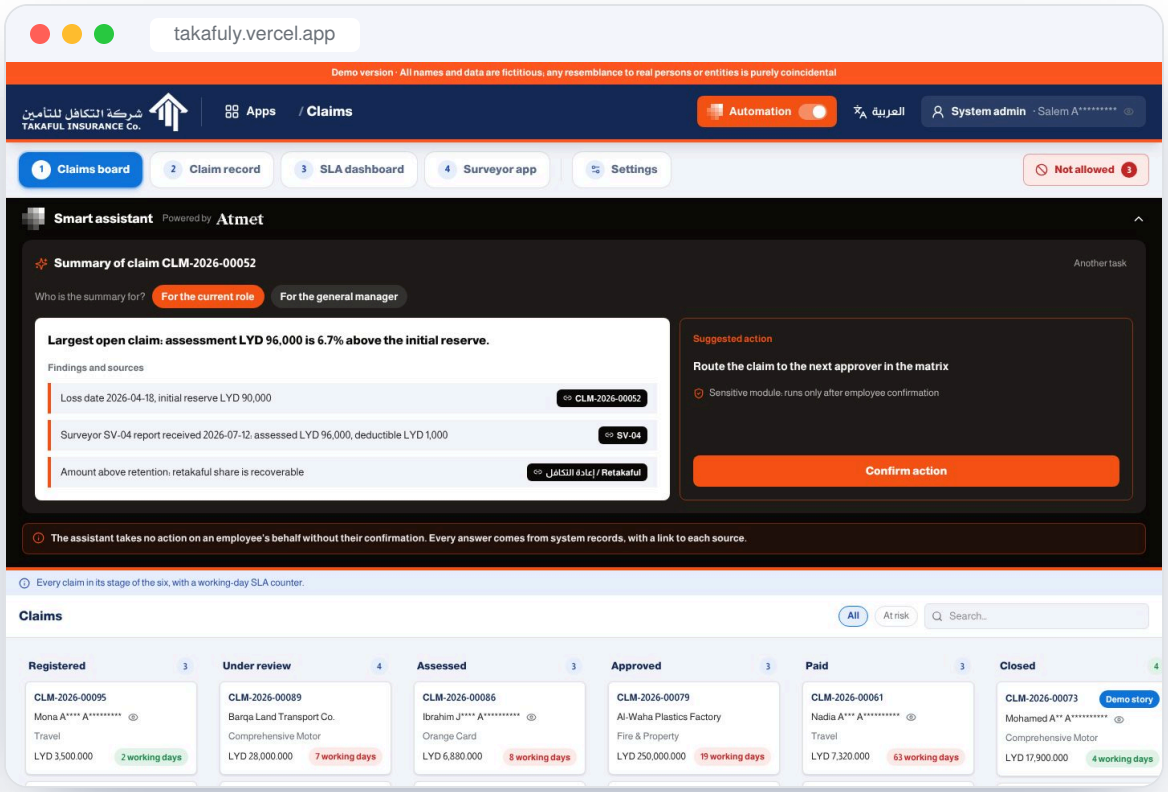

Six strict stages; paid in under 5 working days

Powered by Atmet

Before: automation off

After: automation on

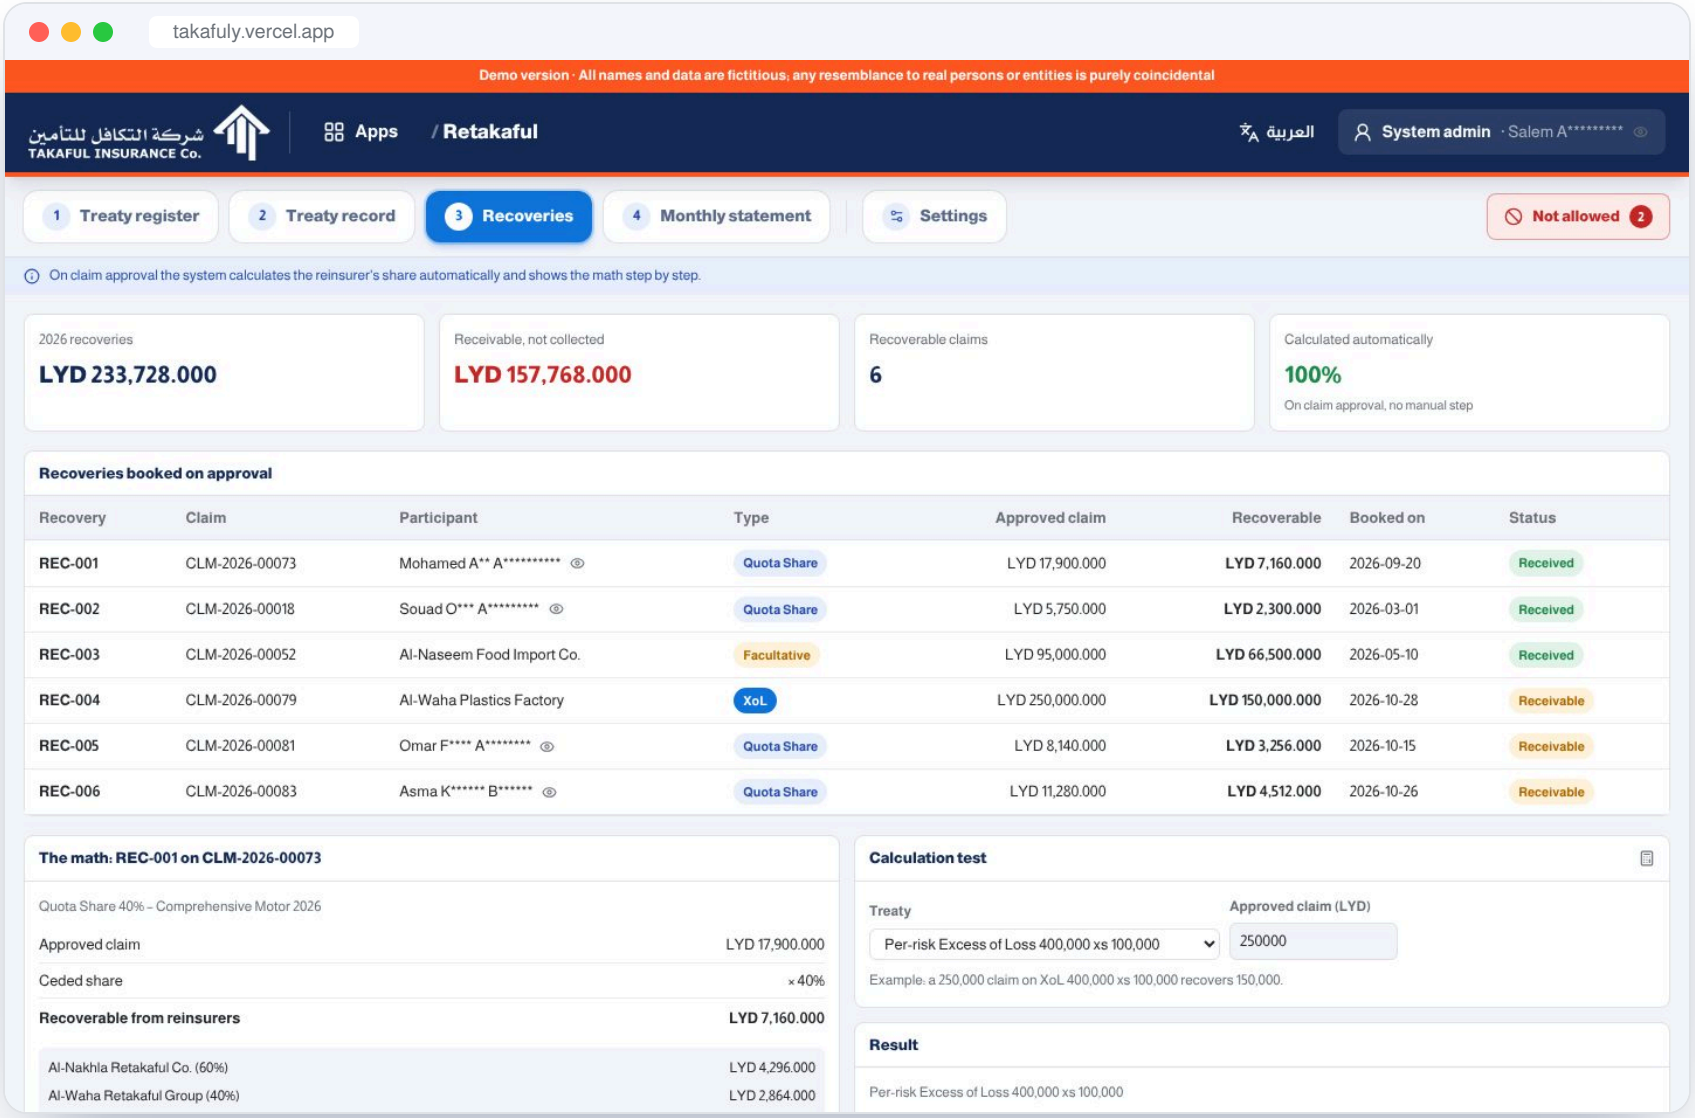

Retakaful

Treaties, automatic cessions and recoveries, monthly reconciliation

Proposal §3.5

- **Treaty register**
- **Treaty record**
- **Recoveries**
- **Monthly statement**

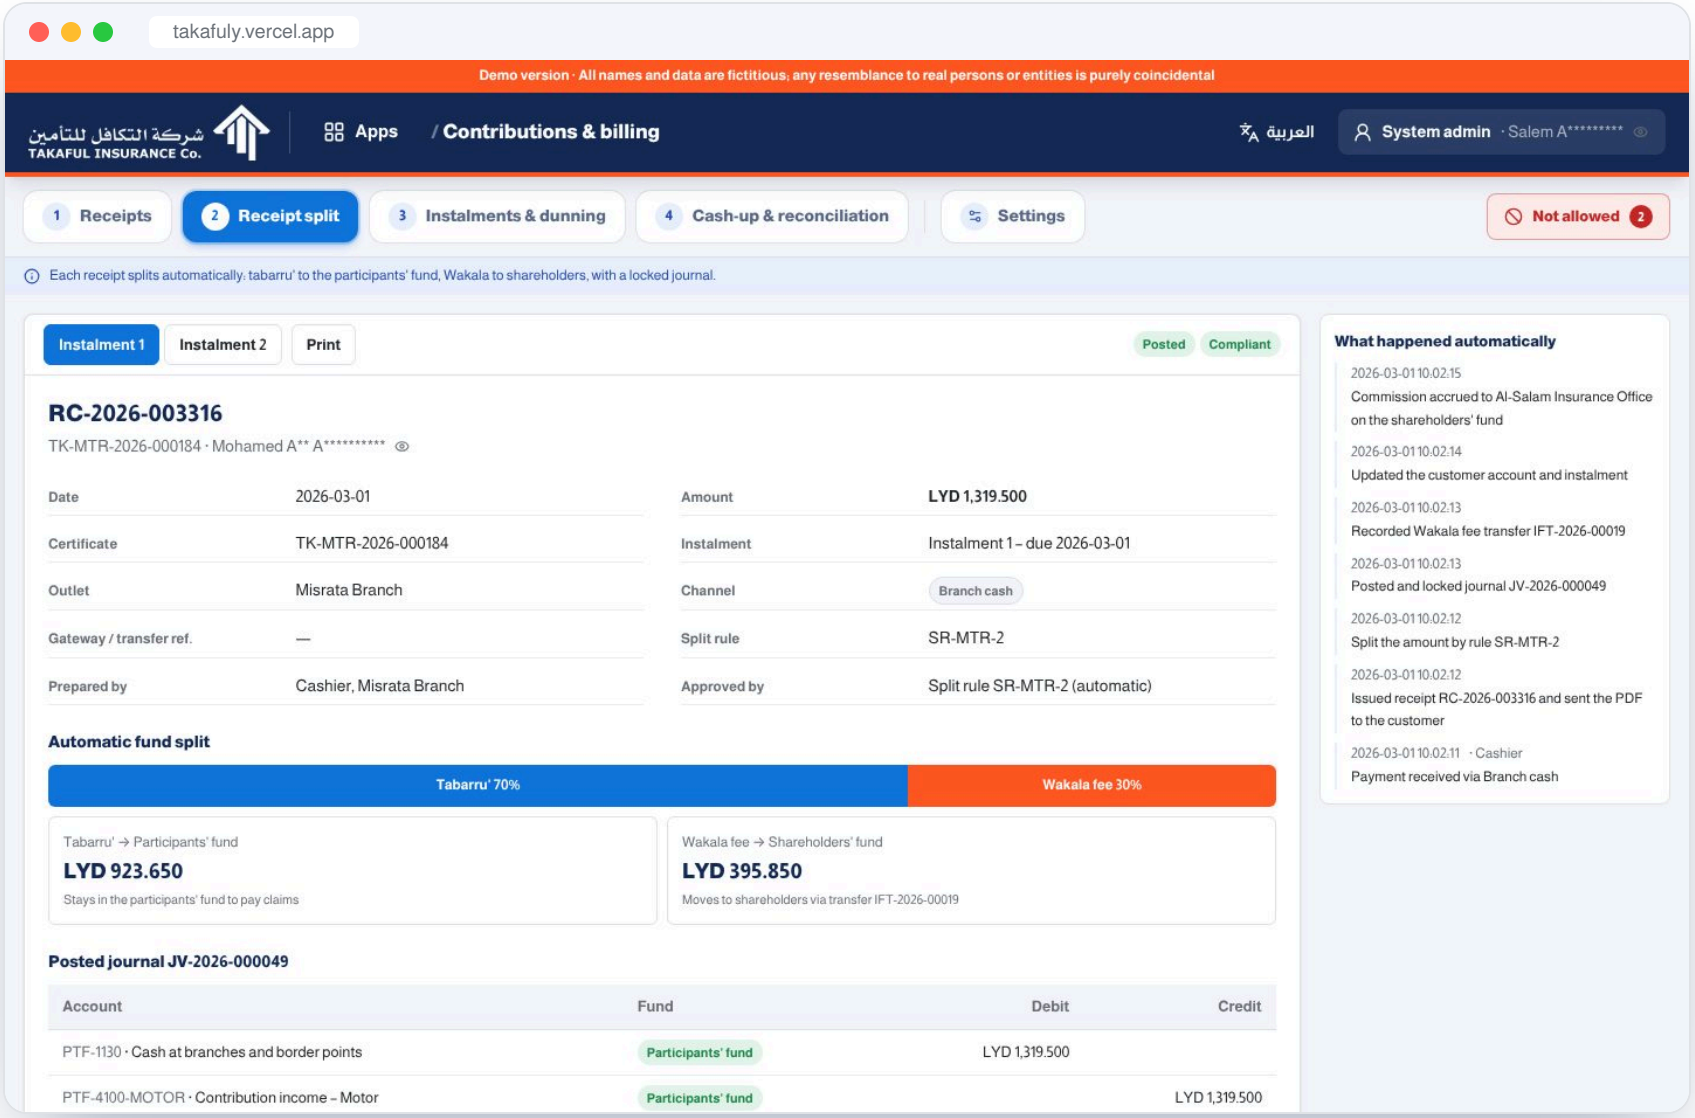

Contributions & billing

Contribution collection on every channel, with an automatic split between the funds

Proposal §3.6

Sensitive module

- Receipts
- Receipt split
- Instalments & dunning
- Cash-up & reconciliation

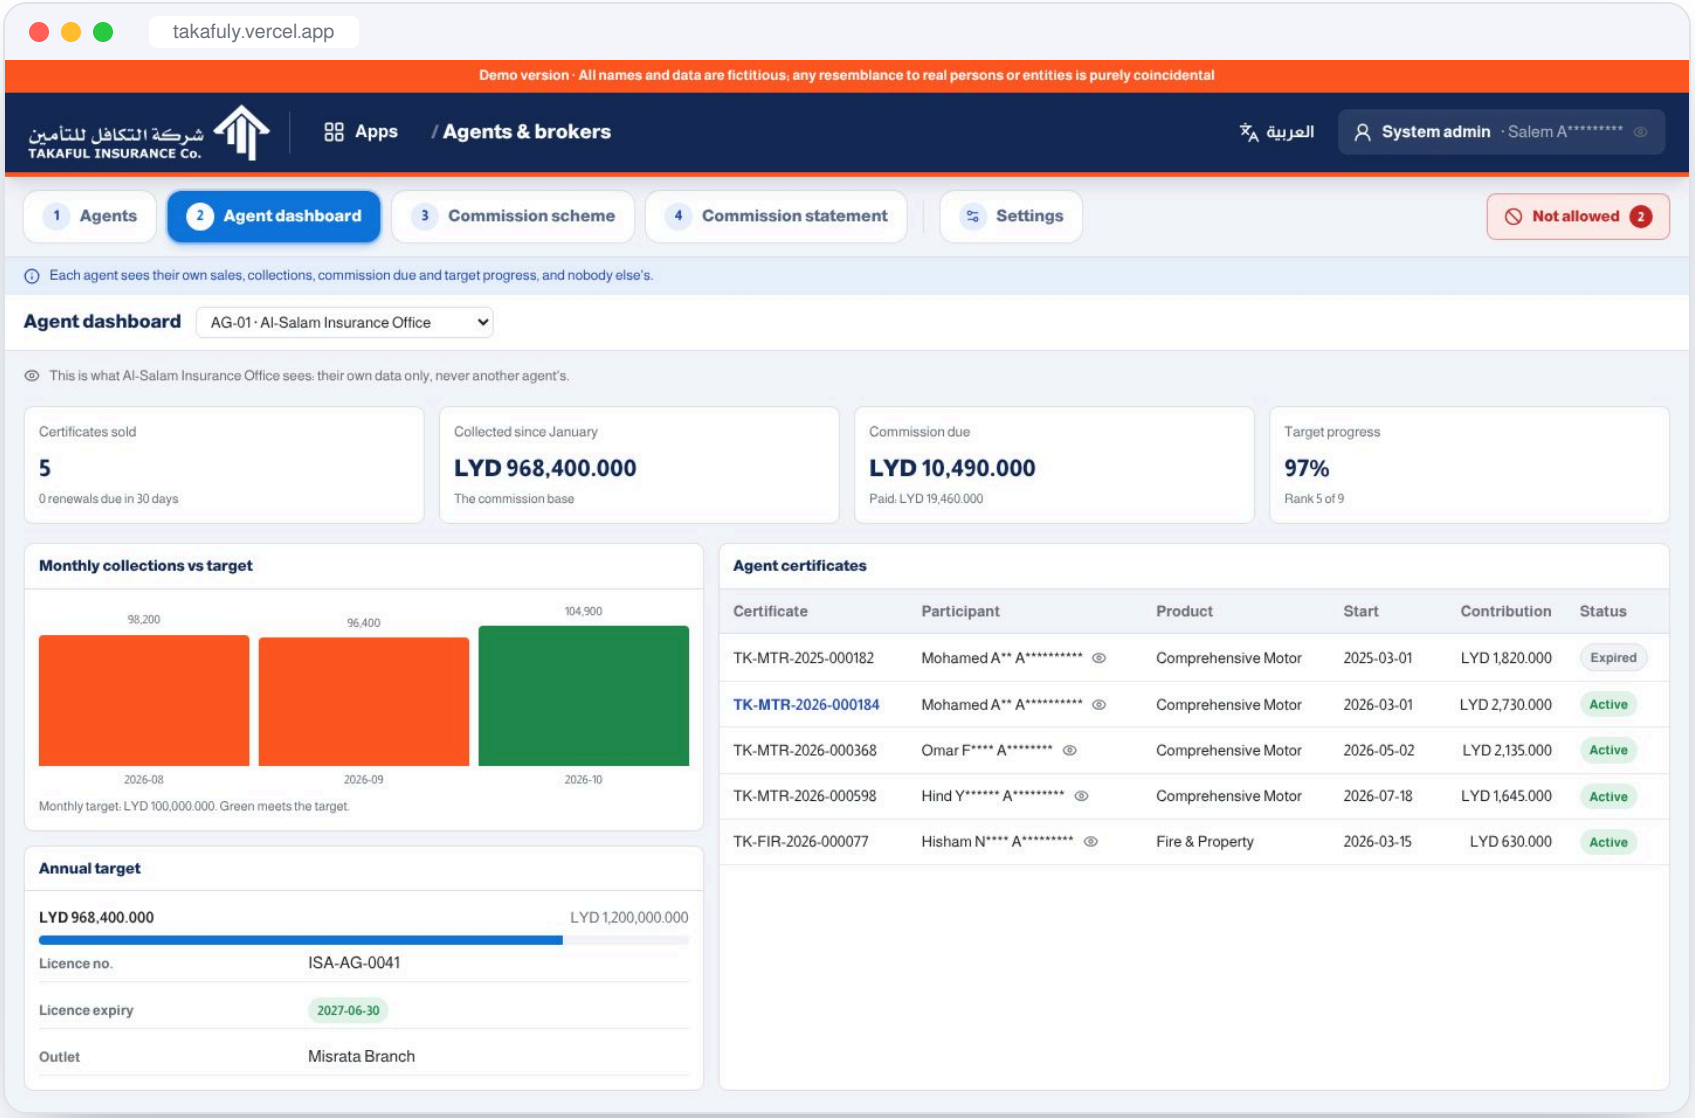

Agents & brokers

A dashboard per agent and tiered commission on collected business only

Proposal §3.7

- Agents
- Agent dashboard
- Commission scheme
- Commission statement

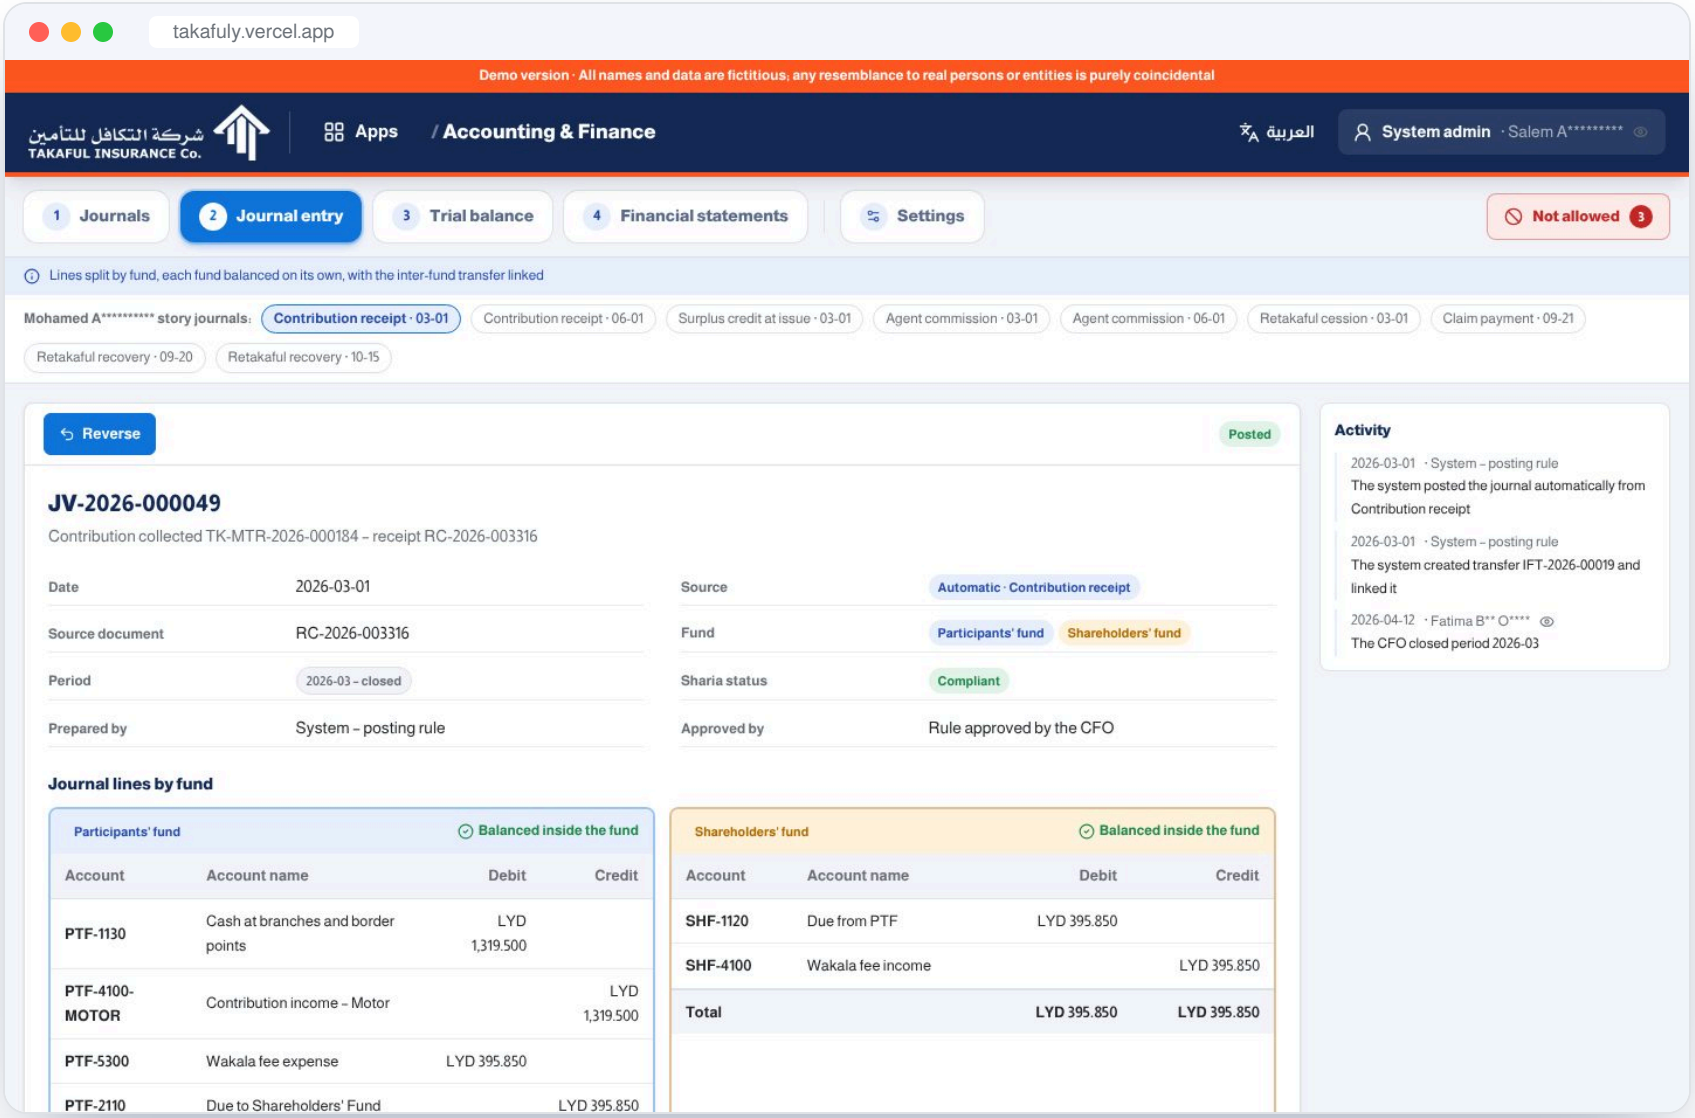

Accounting & Finance

Automatic journals for every action, each fund balanced on its own, statements in one click

Proposal §3.8

Sensitive module

- Journals
- Journal entry
- Trial balance
- Financial statements

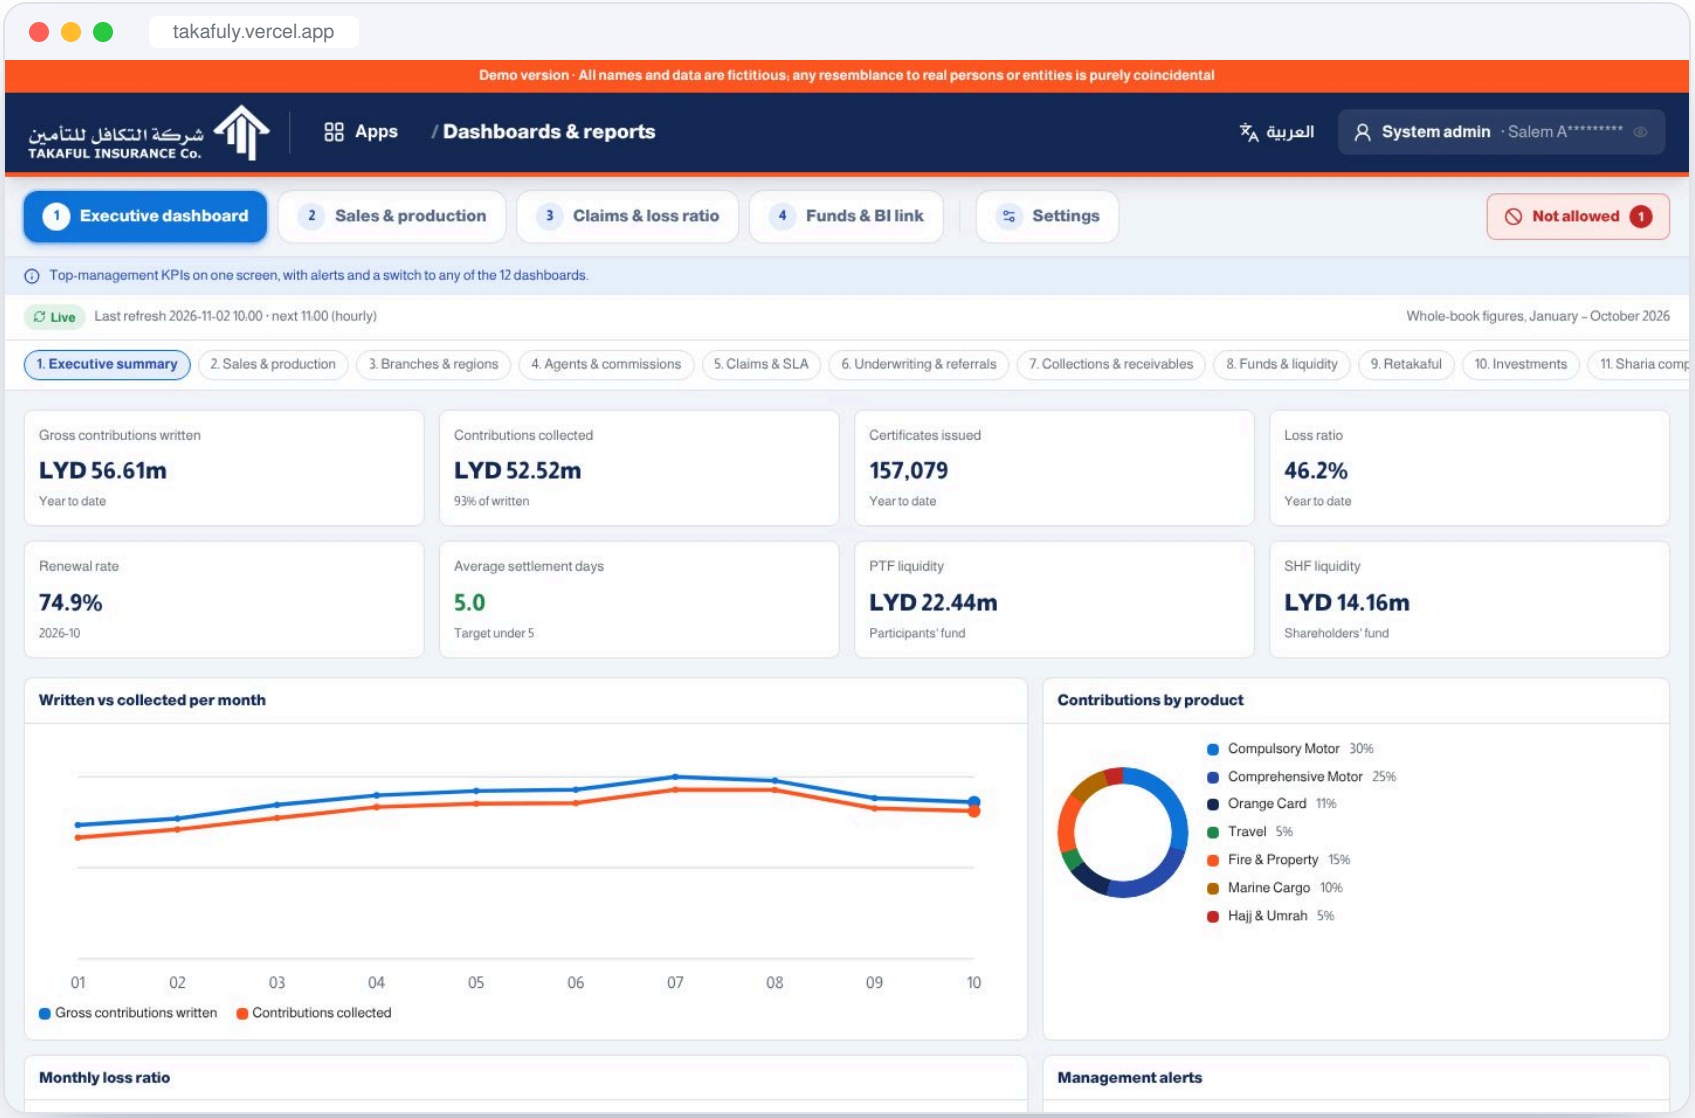

Dashboards & reports

24 KPIs and 12 interactive dashboards refreshed hourly, linked to Metabase or Power BI

Proposal §3.9

- **Executive dashboard**
- **Sales & production**
- **Claims & loss ratio**
- **Funds & BI link**

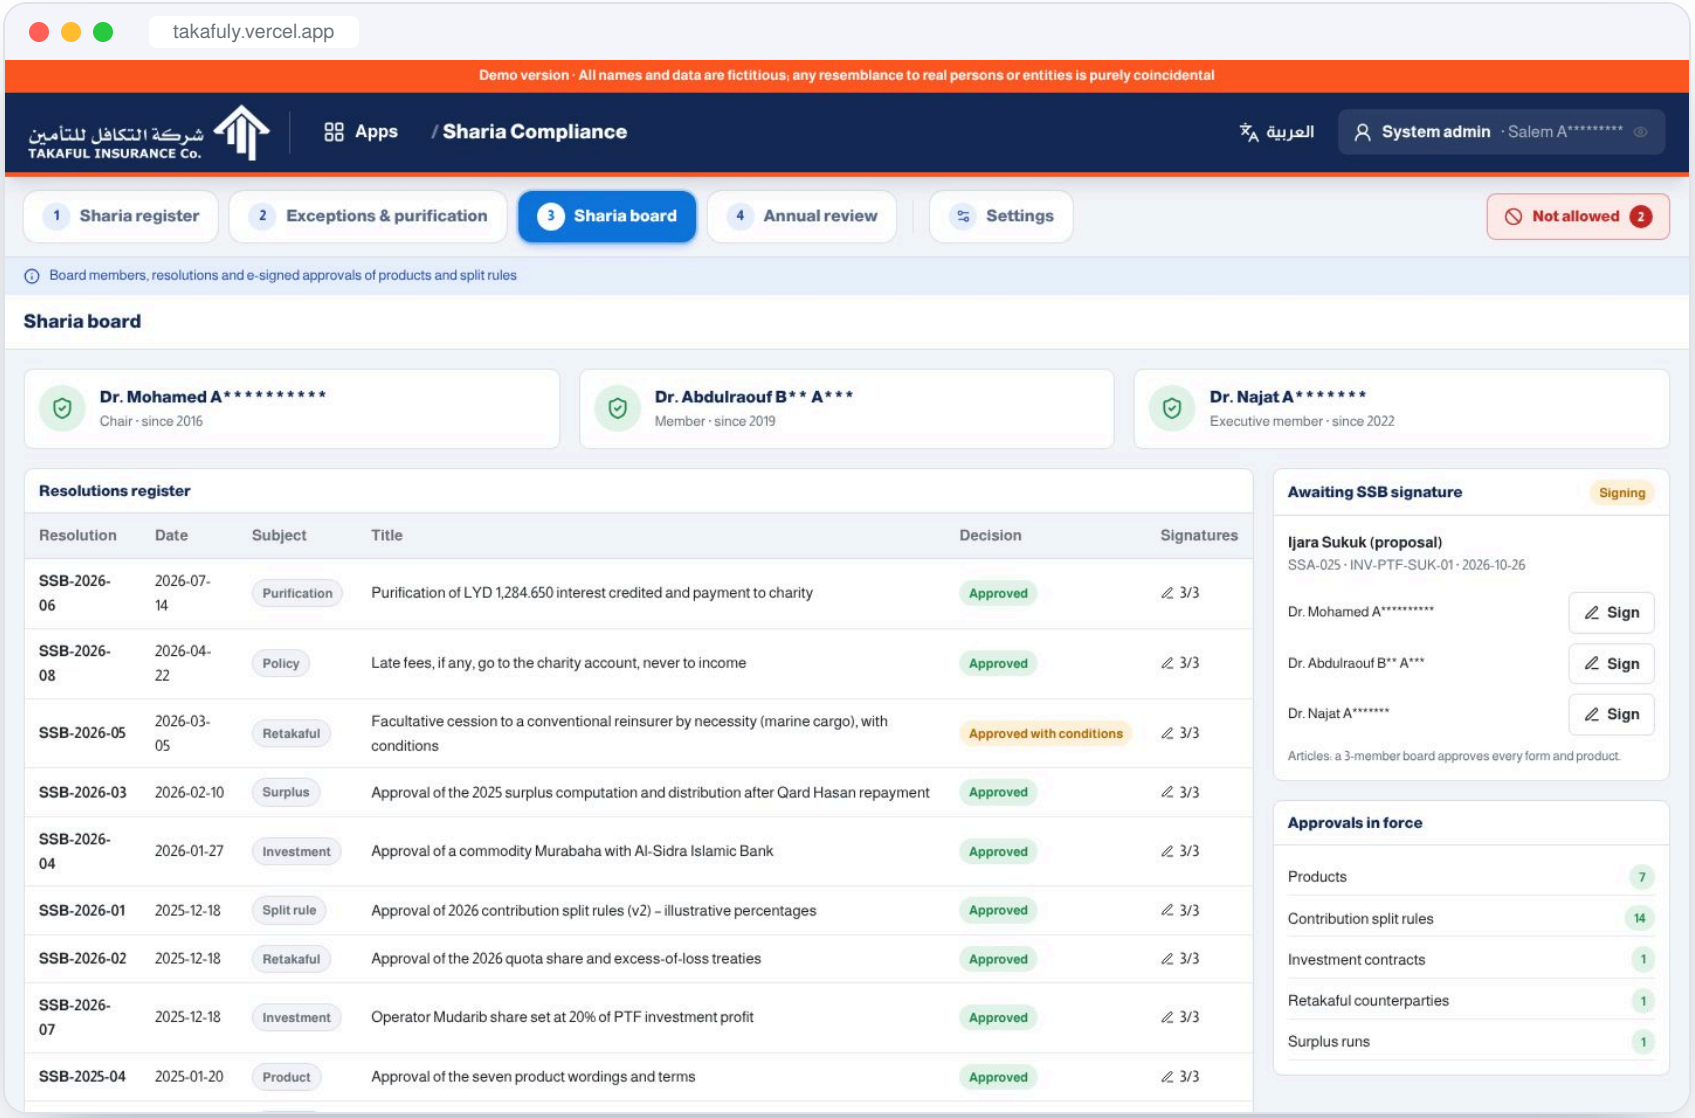

Sharia Compliance

Sharia status on every contract and transaction, exceptions log, SSB resolutions and the compliance certificate

Proposal §3.10 | Sensitive module

- Sharia register
- Exceptions & purification
- Sharia board
- Annual review

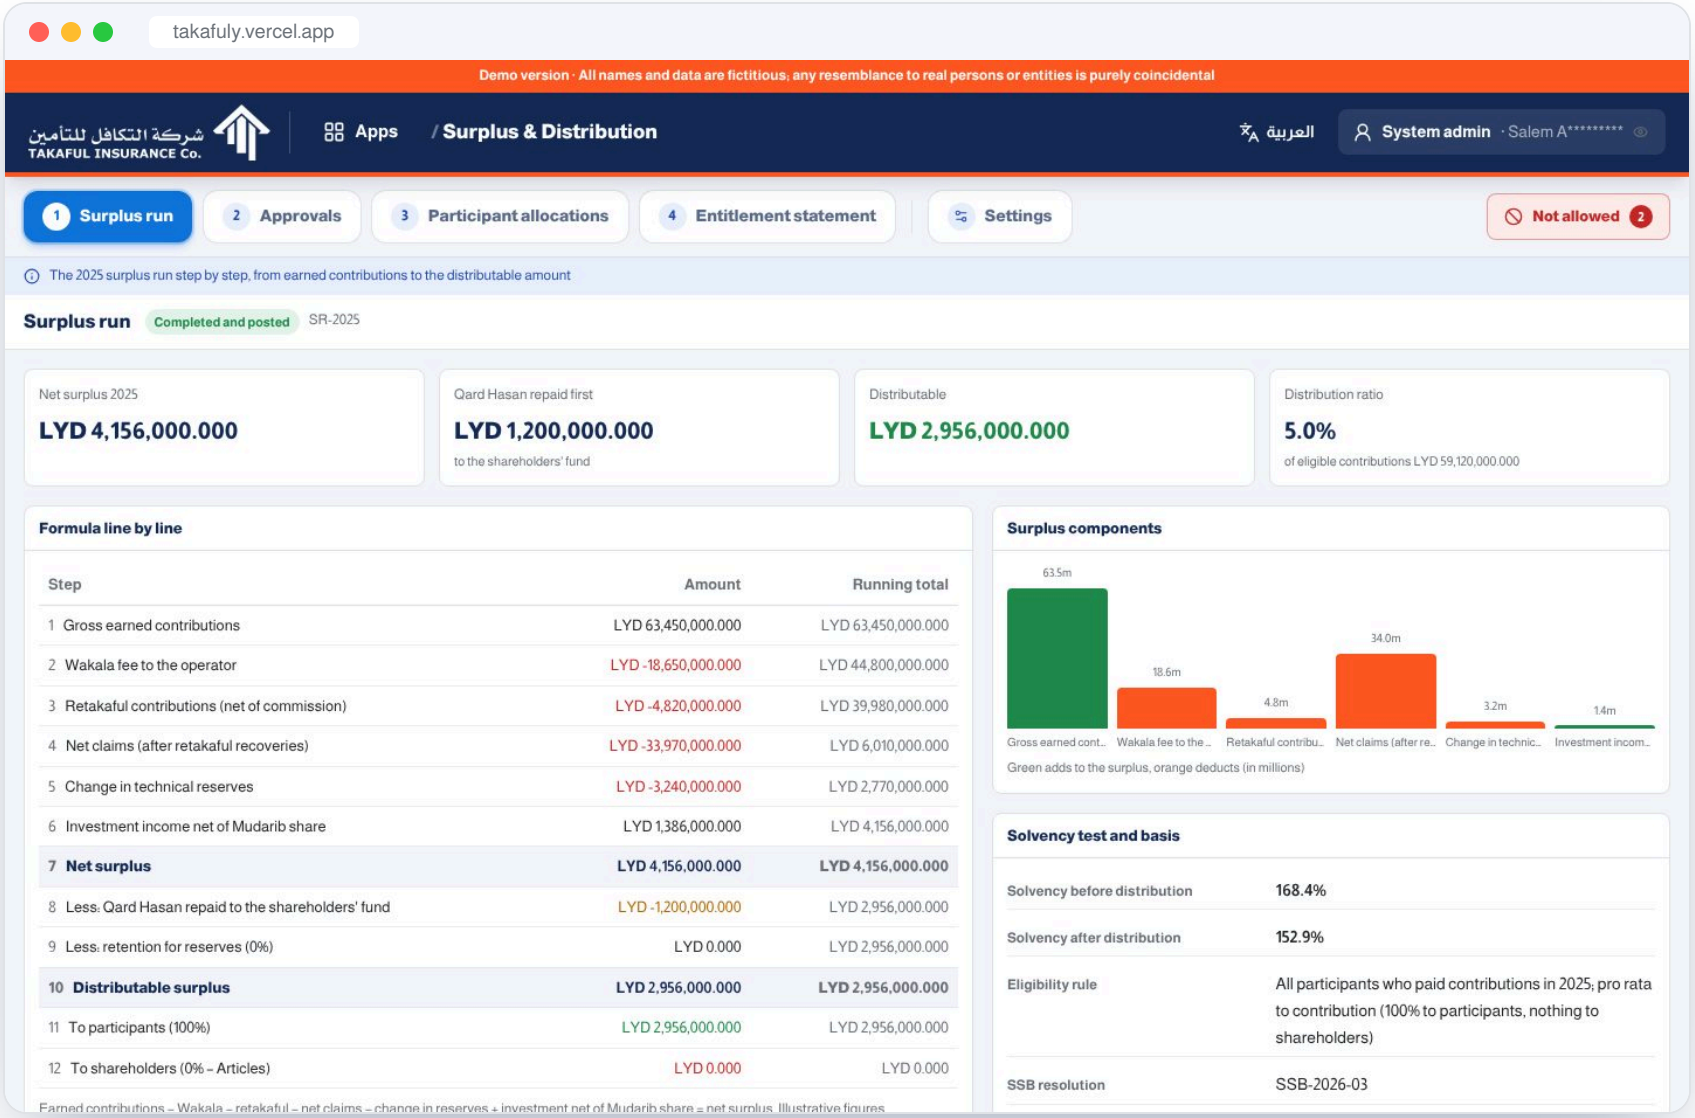

Surplus & Distribution

Step-by-step takaful surplus calculation, with 100% distributed to participants pro rata

Proposal §3.11 · Sensitive module

- Surplus run
- Approvals
- Participant allocations
- Entitlement statement

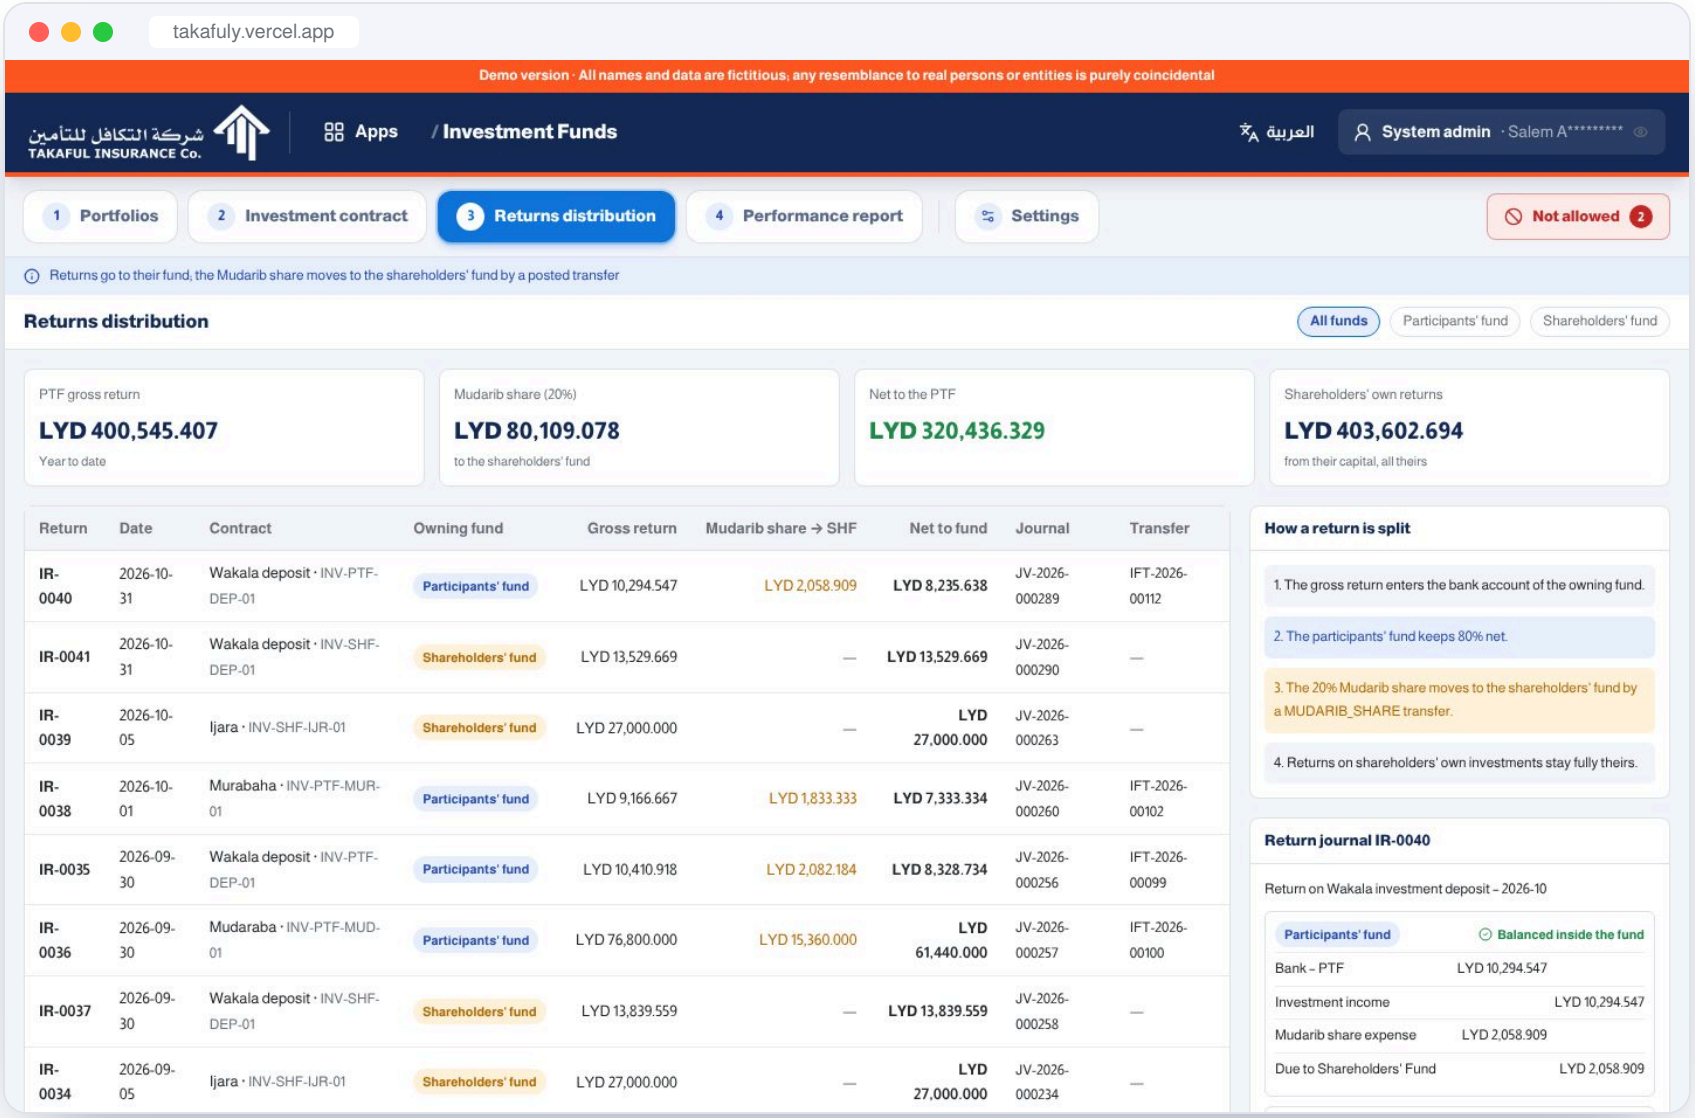

Investment Funds

Separate portfolios per fund with Murabaha, Mudaraba and Ijara, and returns split by the Mudarib share

Proposal §3.12 · Sensitive module

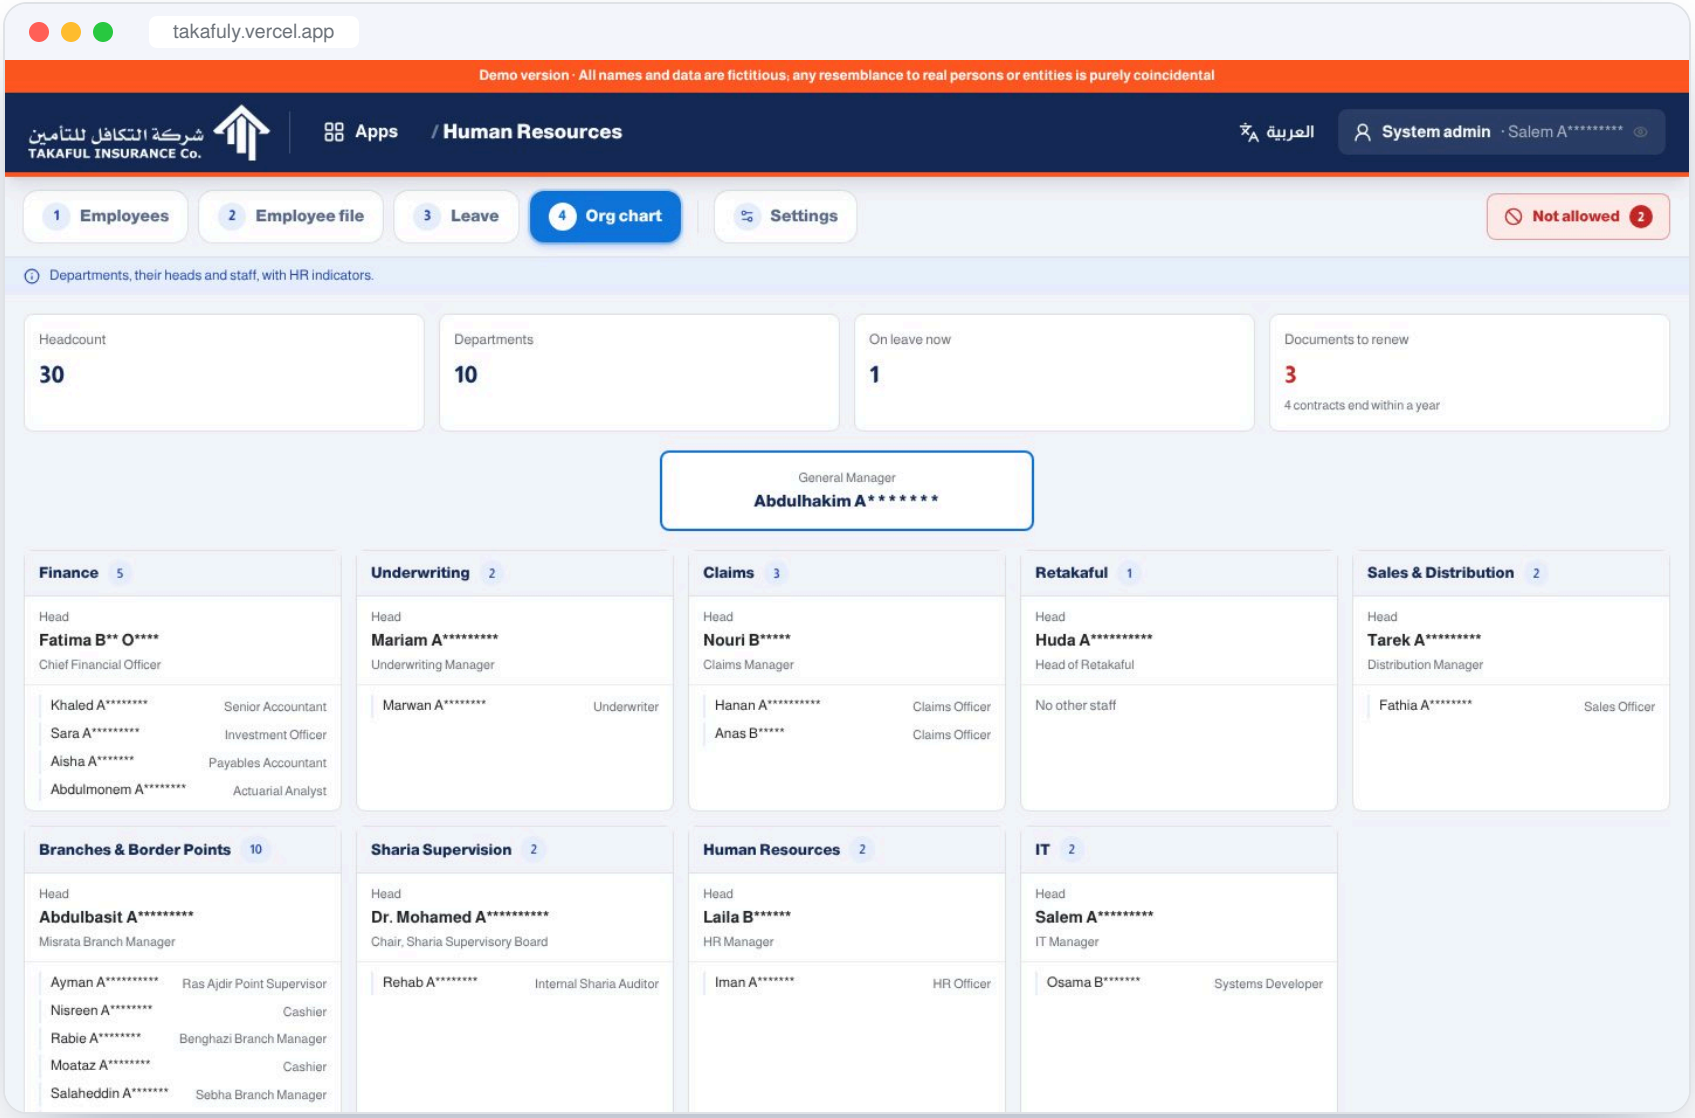

- Portfolios
- Investment contract
- **Returns distribution**
- Performance report

Human Resources

Staff files, contracts and leave; logins follow hiring

- Employees
- Employee file
- Leave
- Org chart

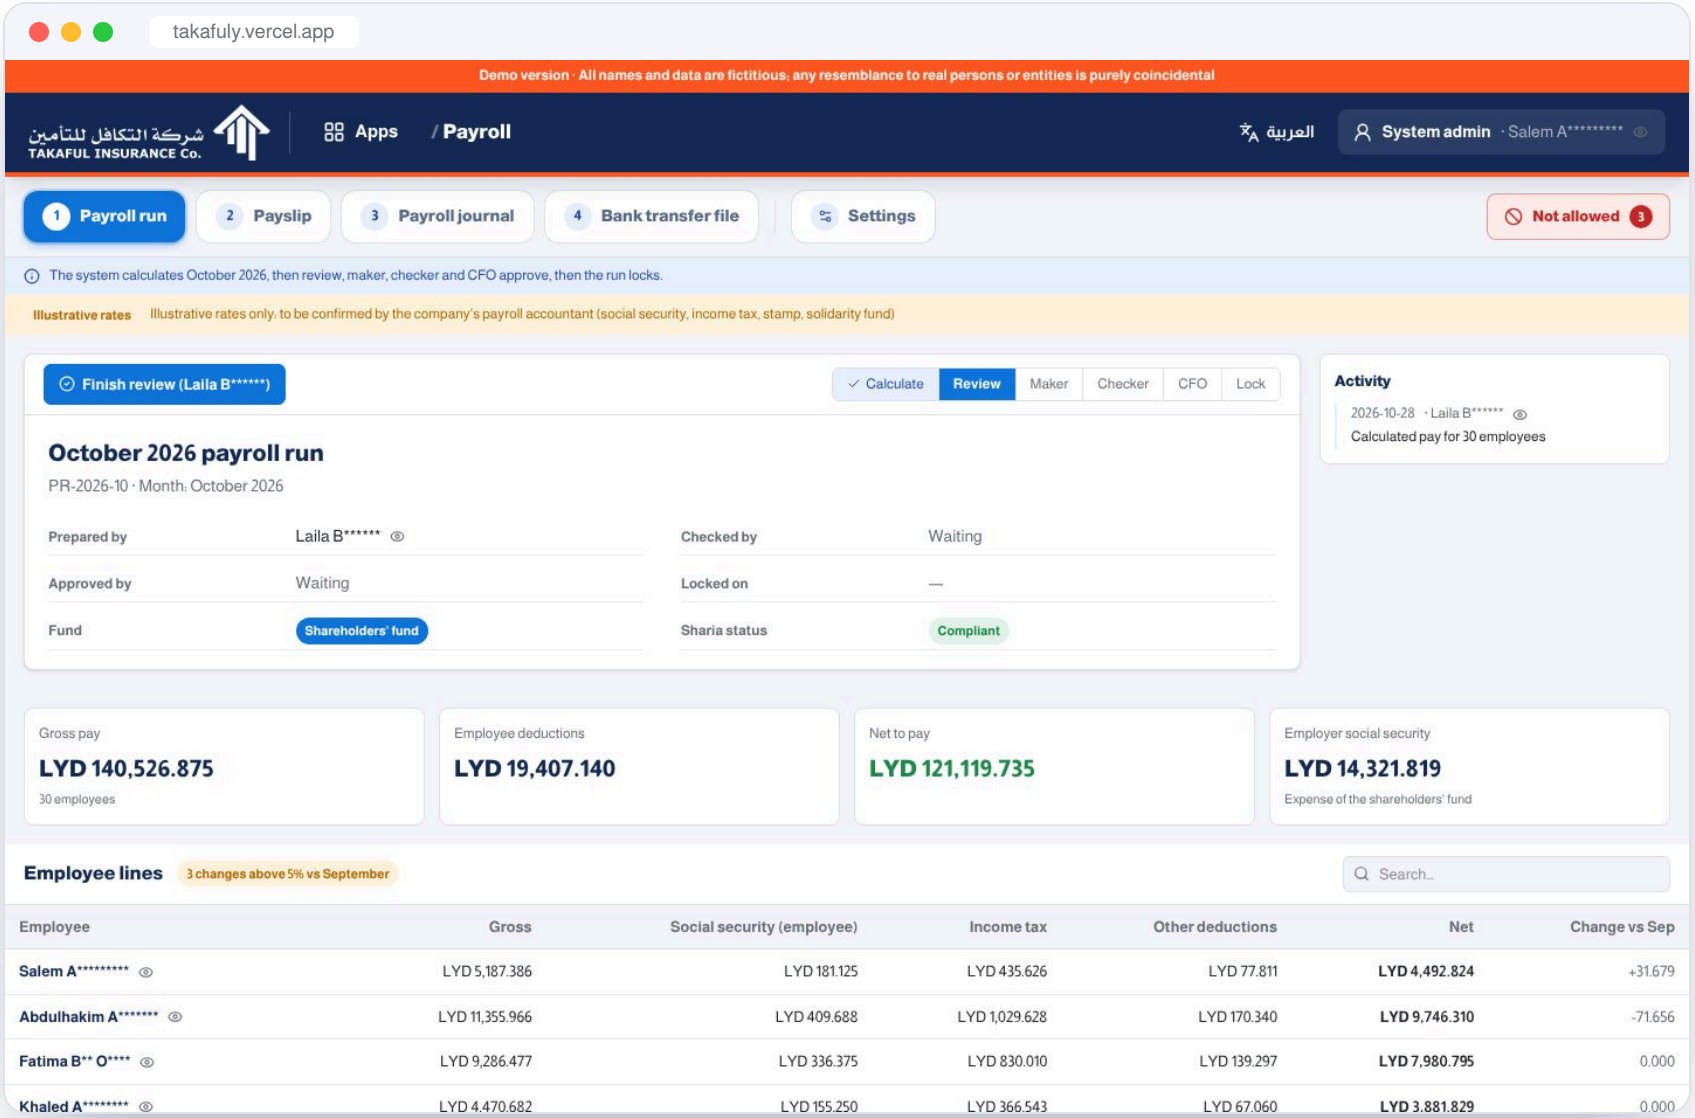

Payroll

Monthly run with maker-checker, posted to the shareholders' fund only

Sensitive module

- **Payroll run**
- **Payslip**
- **Payroll journal**
- **Bank transfer file**

Protecting the sensitive modules

The database itself refuses the mistake, not only the screen.

Customer management

The system blocks saving on a matching national number and shows the existing record

Claims

Strict state machine: the API and the database refuse any skip across the six stages

Contributions & billing

The system splits every receipt automatically by the certificate's approved split rule

Accounting & Finance

The database requires one fund per journal line and an account from that same fund

Sharia Compliance

Sharia status is mandatory on every contract and transaction; never

Surplus & Distribution

A fixed formula shown line by line, no manual figures

Investment Funds

Every contract and counterparty needs an SSB resolution before booking

Payroll

Whoever prepares the run cannot approve it: checker, then CFO

Hosting on company servers or in the cloud

One Docker package

Application

Background worker

Database

PostgreSQL

Company on-site servers

or the cloud

AWS

Azure

Three independent environments

Development

Test

Production

Daily backups

Data migration from Oracle

Delivery in 3 months

Two months of building, one month of rollout, data migration and training.

Build

Month 1

Foundation & front office

- Customer management
- Underwriting & risk
- Policy issue & renewal
- Contributions & billing
- Accounting & Finance

Users, access, dictionary, products

Month 2

Claims, money & reports

- Claims
- Retakaful
- Agents & brokers
- Sharia Compliance
- Investment Funds
- Surplus & Distribution
- Dashboards & reports
- Human Resources
- Payroll

Full testing of every module

Rollout

Month 3

Going live

- Data migration from Oracle and reconciliation
- User acceptance testing (UAT)
- 5-day training and user manuals
- Go-live and parallel run

Key information before building

All other decisions are default settings, changeable later.

1. **Current system**
2. **Servers**
3. **Data to move**
4. **Wakala & Mudaraba**
5. **Chart of accounts**
6. **Products & tariffs**
7. **Branches & border points**
8. **Banks & payments**
9. **Retakaful**
10. **Sharia board**
11. **Staff & departments**
12. **Payroll**

Next steps

1

Demo walkthrough with any role

2

Key questions answered and modules ranked

3

Terminology review in the dictionary

4

Build starts once the information is complete
